Is the bathroom heating lamp safe?

### What is a bathroom heating lamp?

Bath heating lamp is a type of lamp designed to create heat, avoid cold feeling during bathing process. Typically, bath heating lamps use heating technology with halogen lamps.

Halogen lamps are gathered at one point to increase heat generation, after just a few minutes the light bulb will emit a tremendous amount of heat, helping the surrounding air to warm up.

Bath heating lamps use advanced, modern technology, safe use in bathrooms, wet environments.

### Is it safe to use a heating lamp?

Infrared light is safe for the following reasons:

**Health-safe infrared light technology:**

The bath heating lamp uses infrared technology, emits infrared light that infrared light like everyone knows is widely used in aesthetics and beauty. Infrared ray is widely used for massage machine, foot massage basin .

Therefore, it absolutely does not harm the skin, helps you relax, relax and release stress very well.

### **You should only use it continuously for 15 minutes so it is not harmful**

Although it is not harmful to health, you should only turn on the light for 15 minutes continuously. You should not use it continuously for a long time. In addition, the direction of the lamp you can restrain the position of the shower will not overheat the skin.

### **Equipped with anti-shock, safe to use in wet environment:**

Heating lamps are often used in bathrooms, so the first safety condition is anti-shock. The heating lamp products are made of anti-rust alloy material, absolute safety insulation.

### **Do not dry skin during use:**

Use infrared lights to heat the temperature, creating warmth for the surrounding environment. This type of heat is heat generated from infrared rays, does not burn oxygen, so it is very good for the health of users, does not cause dry skin, burning skin, even the delicate skin of young children.

### **Does not affect the eyes when viewed directly:**

Bathroom heating products are also gold-plated to reduce glare, but do not reduce the warmth of heating lamps. The bathroom heating lamp can reach a temperature of 30 degrees Celsius within 2-3 seconds, does not take you time to wait.
