

Is the msi modern 14 laptop good? Should I buy it or not?

MSI Modern 14 is an office laptop line launched in 2020 in the Vietnamese market. Many people when looking for a laptop for studying and office work are advised to buy this product. But is the MSI Modern 14 laptop good? Should you buy it or not?

If you are looking for a suitable and convenient laptop model for students and office workers. MSI Modern 14 laptop will be one of the choices that can be considered. So is MSI modern 14 laptop good? Should you buy it or not?

Review laptop msi modern 14 is good?

Slim and elegant design

MSI modern 14 is designed to be thin and light, with a thickness of only 16.9 mm and a weight of 1.3 kg, this is the thinnest and lightest 14.1 inch laptop on the market today.

MSI Modern 14 has the logo printed in the middle of the aluminum body with sharp, delicate lines, exuding elegance and luxury.

The device is not only beautifully designed but also durable so users can rest assured when using it. Even if it falls or is impacted, it will not affect the hardware inside the device much.

Powerful performance with superior configuration

Compared to laptops for students and office workers of other brands on the market, MSI laptops have a much superior configuration. Equipped with 11th Gen CPU, 3200MHz DDR4 RAM and M.2 PCIe SSD hard drive to optimize the speed of processing programs on the computer.

In addition, using this laptop line to design 2D images, with the Intel® Iris Xe Graphic VGA graphics card will help you do that easily. It can be seen that the performance of this MSI line is enough for you to work, study, design, and play games every day simply and smoothly.

Sharp screen, full HD, IPS panel

The new version has a 14-inch screen, Full HD resolution, IPS panel. This is a very impressive screen with an ultra-thin bezel design, wide viewing angle, high definition and a maximum brightness measured at up to 365 nits. The brightness of the MSI Modern 14 is superior to its competitors (most laptops in this price range only have a brightness of 250 nits).

Thanks to that, it can be used well even when sitting outdoors or even in the sun. The thin border of only 5.7mm makes the screen account for 80% of the total screen ratio, expanding the viewing angle for users.

Unique keyboard design

The keyboard of MSI Modern 14 looks quite unique, very similar to a keyboard. The keyboard has LED lights underneath to decorate it beautifully, you can also study and work in low light conditions.

The touchpad has a smooth, matte surface, feels very smooth when used, and the mouse clicks are quite smooth, without making loud noises. However, the touchpad area is a bit small, which is a bit inconvenient for some users with large hands.

Full range of connection ports

Aiming for convenience, there are full connection ports.

The left side includes 1 HDMI port, 1 USB-C port and charging port.

The right side includes 2 USB-A 3.2 gen 1 ports, microSD and 3.5mm headphone jack. Compared to the Ryzen version, the USB standard has been upgraded from 2.0 to 3.2 Gen 1, so the transmission speed is faster.

High Battery Life

The device is equipped with a 50WHrs Li-ion Battery that allows you to work all day long with a maximum battery life of up to 8 hours. You can use the battery for 8 hours, go to work or school all day without worrying about running out of battery, extremely convenient for users on the go or in case they forget to bring a charger.

Exclusive CoolerBoost cooling system

One of the advantages of the Modern 14 is the exclusive CoolerBoost cooling system with 1 dedicated fan and 2 heat pipes. The GPU and CPU will always be cool even if you use the machine continuously all day and open specialized software.

As a product from the prestigious computer brand MSI, you can completely rest assured when choosing MSI Modern 14. Compared to the 10th generation version, this 11th generation line has many new and better upgrades, typically a much more powerful configuration.

Should I buy MSI Modern 14 laptop?

After reviewing the MSI Modern 14 laptop, many people asked whether they should buy it or not. With outstanding advantages compared to laptops in the same segment, the Modern 14 laptop is a product chosen by many people.

Slim, lightweight, convenient design, stable performance, extremely suitable for office workers or students to use for studying, working or playing games for daily entertainment.

The compact appearance and long battery life will be very suitable for office workers, young people who are passionate about creativity and love dynamism. MSI Modern 14 is the perfect combination of both studying and working.

Conclude
