

Is your ID card number, insurance book number and salary required to be secure?

So when leaking ID number, insurance book number, salary ... what dangers will you face? How we need to be secure. Let's find out through the article below.

Many people often think that, with their names and birthdays, hackers will do nothing. However, if you are thinking like that, you are wrong, sometimes just with these two data many people may lose their ID number. After that, these guys will continue to attack information from your family members and they will know all the information about you so it is easy to switch procedures to harm you or turn you into a debtor.

So when leaking ID number, insurance book number, salary . what dangers will you face? How we need to be secure. Let's find out through the article below.

When the ID number is leaked, you can suddenly become a debtor

When you get ID numbers of bad objects, you can use it to declare a loan record or register financial services without your knowledge, then you can fall into the black list, get the bank debt call. Of course the problem will be solved, but it will take a lot of time and make you more annoying.

There are also a few cases of getting ID numbers to register subscriber numbers without the victim's knowledge, until the network sends money to the new fire. Sometimes you won't be asked for money, but the consequences that SIM causes are endless and it can cause you to get caught up in unnecessary problems.

ID card numbers can also be used to book tickets, to book credit cards hacked

Besides, there are many users who are using bad ID numbers to book hotel rooms, buy air tickets, trains or luxury services. This is the ideal method for bad guys to legally convert and use your credit card money without much trouble with the service provider.

Don't think that your ID number doesn't appear online or Facebook, Zalo is okay. You may not post them on this, but every time you enter it via the web to book a hotel or flight ticket, it is very likely that information will be leaked by hackers, from which your data will be easily fall into the wrong hands and floating online.

Is the number of insurance books important?

In Vietnam, the full name is Social Insurance Book Number (SI). When you have this number in your hand, you or anyone can easily look up all information about you such as salary, insurance process . Currently, although insurance requires users to look up There is a need for ID numbers, but don't be subjective because there are many dangers around you and they can steal your information at any time without your knowledge.

In addition, information about your position can be easily looked up when there is a social insurance book number. This is not everyone will have trouble because the information is relatively open, you can easily view the position of others through their public records, especially on Facebook and on LinkedIn.

Why must pay security?

Today, most companies and businesses are secretive of employees' income, so if anyone accidentally learns your salary, it can become jokes, gossip of all People, or worse, be careful, you will probably be monitored and robbed.

If you notice how many people share how you can see your salary just by the name + date of birth from Facebook, then many people say that it is not serious to pay insurance premiums. But this is extremely wrong thinking. Not all companies have to cover the law to pay less insurance, I know and have worked through many companies paying full 100% salary. If those who work in these companies leak salaries across this route, it will be extremely dangerous.

Leaking salaries will also cause you trouble with bad colleagues in the company. Jealousy, envy and jealousy because salary is not rare, and even if you don't care, it will bring you no trouble.

Work place, business address, position . more important than salary

Even if you are not worried about salary leaks, it is easy to look up information about where the work can be taken to trick other people, even trick your loved ones. Imagine if someone called your mother and said that you were born on the xx month xx year when she was working at ABC company with the job of scanning rubbish, she was in debt of 100 million VND and asked her to pay right away? Similarly, if someone uses information about your job to register for financial services, to order an online ship to arrive, it will also entail a lot of problems behind.
