

ISNONTEXT function - The function returns True if the value is not a text value in Excel

ISNONTEXT function: The function returns True if the value is not a text value in Excel. Application function to check if the value is a text or not. Syntax: ISNONTEXT (value)

The following article introduces you to the **ISNONTEXT** function - one of the functions in the information function group is very popular in Excel.

Hàm ISNONTEXT

Description: The function returns **True** if the value is not a text value in Excel. Application function to check if the value is a text or not.

Syntax: ISNONTEXT (value)

Inside:

- **value:** The value you want to test is a text value or not, is a required parameter.

Attention:

- The function returns **True** if the value is not a text value and vice versa returns a **False** value .

- Where **value** is a logical value or a blank value -> the function returns **True** value .

For example:

Is determining the value in **value** a text value?

	A	B	C	D
2				
3		Hàm ISNONTEXT trong Excel		
4		<i>Nhóm hàm thông tin</i>		
5		<i>STT</i>	<i>value</i>	<i>ISNONTEXT(value)</i>
6		1	205	
7		2	Excel.net	?
8		3	Thủ thuật	
9		4	FALSE	
10		5		
11				

ThuThuatPhanMem.vn

- In the cell to calculate enter the formula : = ISNONTEXT (C6)

	A	B	C	D
2				
3		Hàm ISNONTEXT trong Excel		
4		<i>Nhóm hàm thông tin</i>		
5		<i>STT</i>	<i>value</i>	<i>ISNONTEXT(value)</i>
6		1	205	=ISNONTEXT(C6)
7		2	Excel.net	
8		3	Thủ thuật	
9		4	FALSE	
10		5		
11				

ThuThuatPhanMem.vn

- Press **Enter** -> return value is:

The screenshot shows the Excel interface with the formula bar containing `=ISNONTEXT(C6)`. Below it is a table with the following data:

STT	value	ISNONTEXT(value)
1	205	TRUE
2	Excel.net	
3	Thủ thuật	
4	FALSE	
5		

- Here cell C6 is a numeric value, not a text value, so the function returns **True**.

- Similarly copying the formula for the remaining values ??results:

The screenshot shows the Excel interface with the formula bar containing `=ISNONTEXT(C6)`. Below it is a table with the following data:

STT	value	ISNONTEXT(value)
1	205	TRUE
2	Excel.net	FALSE
3	Thủ thuật	FALSE
4	FALSE	
5		

- Where **value** is a logical value or a blank value -> the function returns **True** value .

STT	value	ISNONTEXT(value)
1	205	TRUE
2	Excel.net	FALSE
3	Thủ thuật	FALSE
4	FALSE	TRUE
5		TRUE

Above are instructions and some specific examples when using the **ISNONTEXT** function in Excel.

Good luck!
