

It seems that the 'extreme' square camera cluster on iPhone XI is not a rumor

Apple's new generation iPhone is becoming a topic of discussion, even leading to fierce controversy on many forums, technology groups around the world, not because of curiosity about specs but rather in 'creative' designs that Tim Cook and his colleagues created.

Apple's new generation iPhone is becoming a topic of discussion, even leading to fierce controversy on many forums, technology groups around the world, not because of curiosity about specs but rather in 'creative' designs that Tim Cook and his colleagues created.

People are passionate about smartphones in general and of course all Apple fans are eagerly and anxiously waiting to see if the Cupertino giant really brings the 'extreme' camera cluster to the upcoming iPhone. . Here we will not discuss whether this camera cluster is beautiful or ugly, because each person possesses a different perspective on beauty, which will only talk about the 'strange' element.

1. Users forget to increase the brightness of the MacBook Pro screen, Apple thought the device was broken and spent more than \$ 10,000 for warranty

iPhone 11 Max will own a square camera cluster

In fact, this 'banh chung' square camera is not new, it has been brought up by Huawei on its flagship Flagship and received very positive feedback from the user community. But Apple's design of this camera cluster doesn't seem to be very good, it's too coarse, and asymmetric, and in particular is deviated towards the top left corner instead of the middle as on the products of Huawei.

Just passing through some technology forums, it's not hard to see that the majority of technology enthusiasts, including the enthusiastic fans of apple, are not very sympathetic to this style of design. . Many opinions even suggest that these are just images, rumors unfounded by the appearance of such camera cluster on a high-end product like iPhone is too unbelievable.

1. Apple added many new features to Apple Maps in iOS 13, resolving its market share from Google Maps

The camera cluster on iPhone 11 Max and iPhone 11 will be set to one side

And while the debate is still going on at the most intense stage, when the iFan community is still "bewildered", the famous mobile accessory maker, Olixar, has added salt. their hearts with a move to release a series of phone-ready accessories will be released in the next few months, including the iPhone XI of course, and the problem lies in the toughened glass panels. Olixar created camera protection force which was designed almost exactly with the camera cluster design of iPhone XI appeared in leaked images.

Specifically, Olixar sent the prototype of toughened glass to protect the built camera cluster for the two iPhone 11 Max and iPhone 11 to one of the largest smartphone accessories retailers in the United States: MobileFun, at the same time. confirm that iPhone XI camera clusters appear in full leaked photos are real. You can refer to a few photos of photos of the iPhone XI camera protection glass in Olixar's collection below:

1. Apple has just unveiled the most beautiful apps and games on iPhone and iPad in 2019

Tempered glass protects the built-in camera cluster for 2 iPhone 11 Max and iPhone 11

The 3-sensor camera cluster is very possible of iPhone 11 Max

The 2 camera sensor cluster is very possible of iPhone 11

In a related move, MobileFun's side after 'receiving the goods' also posted a 'peeling box' video and commented on the details of these panels, as can be seen below:

Video on the screen protector glass with iPhone 11 and 11 Max

The correct answer for this whole "mess" will only appear in September. Anyway, the iFan, if they have a crush on the design of this camera group, should probably start learning how to love it, or take the time to think about which smartphone to buy instead of iPhone XI.

1. Apple WWDC 2019: Mac Pro, iOS 13, Marzipan and what to expect at the biggest technology event of the year for Apple?

In fact, it has proved quite an interesting fact, that the new iPhones often receive criticism, even be wary of appearance designs when they were first released, but eventually they still create a fever, worldwide and become the dream technology item of hundreds of millions of people. Will Apple's upcoming iPhone follow the same scenario? Let's wait and see!
