

It turns out a meal of banana slugs is like this

The snail eats each dandelion leaf like an active vacuum cleaner.

The snail eats each dandelion leaf like an active vacuum cleaner.

1. 3 creatures still "resilient" survive after being eaten
2. Shivered by the snail 6,000 teeth that eat deep in the earth like monsters in the movie

R. Jeanette Martin, a Canadian photographer recorded the entire 30-minute banana snail meal as he chewed a dandelion leaf and thanks to the timelapse mode to create a stunning 36-second video. great

Banana slug (*Ariolimax*) is a North American slug species. They are usually yellow and sometimes have brown spots, like ripe bananas (or overripe). Individual slugs change color according to changes in feed consumption, exposure to light and moisture.
