Gaming laptop Asus G74Sx, which can be pre-ordered, is the series with the latest hardware parameters and new designs.

Gaming laptop Asus G74Sx, which can be pre-ordered, is the series with the latest hardware parameters and new designs.

>>>Asus unveils laptop model to play ROG G74SX game

The new model belongs to this Republic of Gamers gaming series of Asus equipped with 4-core Intel Core i7 processor, Nvidia 3GB graphics card, 3D screen option and many other hardware features support for heavy gamers.

Inside the rough shell frame of G74Sx is a powerful configuration, including 12GB RAM (can be upgraded to 16GB), 1.5TB storage system (two HDDs 750GB rotational speed 7200rpm), card Nvidia GeForce GTX 560M graphics and Sandy Bridge Intel Core i7 2630QM processor. Machine with 17.3 'screen supports Full HD 1080p (1920x1080 resolution), backlight keyboard and Blu-ray head can help you enjoy entertainment and gaming.

Other unique features of the G74Sx design are its easy-to-upgrade capabilities and its cooling technology. The machine has a cover that allows you to open quickly without using tools, to remove two hard drive trays and 4 memory slots. Asus also promises that the G74Sx laptop will be able to operate long without heat thanks to the

heat sink design, which helps draw air from the front of the machine and exit the heat at the back of the machine.

The model G74Sx-3DE is priced from 1,979 USD (~ 50 million VND), with Blu-ray recorder and 3D glasses. The G74Sx-A1 model costs from \$ 1,745 (~ 36 million), equipped with a Blu-ray combo reader. Both models can now pre-order at ExcaliberPC.com and are expected to be available from June 28, 2011.
