

# JavaScript code to create bubble chart with custom marker

The example below shows a bubble chart with a customized highlight style and JavaScript source code that you can edit in your browser or save to your device to run locally.

You can present the bubble chart using the default format or any other type of markup such as triangles, squares, etc. This feature can be useful in case the bubble is no longer suitable for illustrating the elements. data point.

The example below shows a **bubble chart with a customized markup style and JavaScript source code that you can edit in your browser or save to your device to run locally**.

Source : CanvasJS

## Tweak the chart

Like other bubble charts, you can change the properties to get the results you want. For example:

1. `markerType`: Change bookmark style
2. `markerSize`: Resize marker
3. `markerColor`: Selection of marker color
4. `markerBorderThickness`: Mark border thickness
5. `markerBorderColor`: Marker border color
