About materials

Julius watches are made from high-quality materials such as good scratch-resistant hardened glass, the case is made of stainless steel, the strap can be high-quality leather or stainless steel . Also, watches Julius also uses state-of-the-art IP color coating technology for very realistic and durable colors over time. So it can be confirmed that Julius watches have good durability.

About the apparatus

Julius genuine watches use a device and battery that comes from Japan, so be assured that the accuracy is quite high. Like many other watches, Julius also offers watches such as Quartz watches (battery-powered watches), mechanical watches (Automatic watches) and Kinetic watches (which are watches made from The most outstanding advantages of Automatic and Quartz sets.

Reference : What is Quartz watch? Should I buy a Quartz watch?

1. For Kinetic watches that can store energy for up to 6 months, if the user does not use it during that time, the watch will still function normally.
2. For Quartz watches, keep in mind that when the clock is running in the wrong time or no longer running, check the battery immediately as it may have run out of battery, if it is too easy to run the battery, it may be damaged.
3. For mechanical watches, you should clean and change oil regularly so that the watch runs smoothly and more durable.

About water resistance

CHỐNG THÂM NƯỚC 3ATM

The genuine Julius watches have a low water resistance, only 30 ATM, which is water resistant at a depth of 30m. This means you can go to the rain, wash your hands, wash your face but avoid contact with the chemical environment such as washing clothes and shampoo. And of course you cannot use Julius watches when participating in water related sports activities such as swimming, diving .
