

Keyboard shortcuts to rotate your computer screen: horizontal, inverted, 180 degrees, 90 degrees.

Rotating your computer screen horizontally, upside down, 180 degrees, or 90 degrees can be a frustrating situation. To quickly fix this, please refer to the keyboard shortcuts for rotating your computer screen horizontally, upside down, 180 degrees, and 90 degrees.

There are many reasons why **your computer screen might rotate horizontally, upside down, 180 degrees, or 90 degrees**, such as children playing with the computer or someone accidentally pressing a keyboard shortcut to rotate the screen without realizing it. These unintentional situations are common and can be confusing. However, with this article on keyboard shortcuts for **rotating your computer screen horizontally, upside down, 180 degrees, and 90 degrees**, you can easily adjust it yourself.

Keyboard shortcuts to rotate your computer screen: landscape, inverted, 180 degrees, 90 degrees.

As introduced in a previous article, Taimienphi shared with readers how to fix the inverted computer screen error and received quite positive feedback. Readers who don't know how can refer back to the article on fixing the 180-degree inverted computer screen error. Now, we will guide you through a simpler way to fix this error using simple keyboard shortcuts as follows:

Ctrl + Alt + Left Arrow : Corresponds to Portrait mode, meaning the screen is horizontal, with the Taskbar on the right side of the screen.

Ctrl + Alt + Right Arrow : Corresponds to Portrait (flipped) mode.

Ctrl + Alt + Up Arrow : Returns the screen to normal mode, corresponding to Landscape mode.

Ctrl + Alt + Down Arrow : Inverts the screen, corresponding to Landscape (flipped) mode.

So, with the keyboard shortcuts introduced above, you now know another easy way to fix a laptop screen that has rotated 180 degrees back to its normal state, right? Please note that the method may vary slightly depending on different operating system versions or graphics card models.

Furthermore, during your daily computer use, you'll likely want to share interesting things or helpful tips with others but don't know how. In such situations, using screen recording software is a top priority. You can refer to our article on screen recording software to learn more about how to use it and its features. Good luck!
