

Kvaern electronic bicycle can run on solar energy

The Kvaern electronic bike inspired by the newly announced BMX, in addition to having only one seat, it also features a solar battery charger that you can move without having to use the net. electricity.

Bicycles with strange designs and designs are becoming more and more popular, such as bicycles that can be folded to fit into backpacks and bicycles with a vertical steering system. Not only that, the Kvaern electronic bike inspired by the newly announced BMX, in addition to having only one seat, it also features a solar charger for you to move. No need to use the grid.

The makers of this car came from Denmark, they gave the Kvaern a cool "Cool Ride" nickname, a uniquely designed car, with a thick aluminum frame, 5-spoke magnesium alloy wheels. , tubes above and below the thickness.

It is controlled by a 250-hp engine, which meets the standards for street bikes around the world, and the 36V battery is sufficiently active to travel 50km. It can accelerate from 0 to 25 km / h in 4.5 seconds and also uses a torque sensor to adjust power to suit user cycling.

This electronic bike has front and rear lights, built-in Bluetooth speaker and small screen on the steering wheel to show the speed, battery level, distance traveled.

When the battery runs out of power, you can recharge it by plugging it into a wall outlet. In addition, the battery can be connected to a solar battery charging system, turning the sun's rays into electricity and storing it in a Tesla Powerwall battery.

Jonas Gissel, maker of Kvaern, said: *"Tesla is undoubtedly a great inspiration for the Kvaern, and like everyone in the world, we are very impressed with what they have done. for the automotive industry"*.

The Kvaern will be launched in Indiegogo, and according to The Verge, it will cost 999 Euro (1,220 USD). If you buy additional accessories for solar charging, you will have to pay an additional 449 EUR (550 USD).
