Toshiba launches a new laptop collection with many improvements in appearance and features. These are the machines of the Portégé M800 series dedicated to the upper class; the Satellite L300 series for non-bumbling users and Po

**Toshiba launches a new laptop collection with many improvements in appearance and features. These are the machines of the Portégé M800 series dedicated to the upper class; The Satellite L300 series is for those who don't need to dazzle, and the Portégé R500 for connoisseurs.**

People in the local technology industry are no stranger to the famous Toshiba Portégé laptops but only have portable products, now this computer line has been officially available in Vietnam.

### **Portégé M800 - laptop for the elite**

Portégé M800 is priced from USD 1,299 to USD 1,399 without VAT. *Photo: Digiworld .*

The new shell processing technology (Fusion Finish) makes the surface of Horizon Line resin and connector on this machine shine. This shell is not only beautiful but also protects the machine from unnecessary collisions. Besides, M800 is equipped with hard drive protection system (HDD Protection) to ensure your data is "immune" to external impacts.

Unlike other Toshiba products, Portégé M800 is equipped with facial recognition software - SmartFace and Finger Printer fingerprint recognition system. These tools are a solid security wall that protects your data

package right inside.

The Portégé M800 series all use the Santa Rosa platform with Intel's new Penryn processor, Core 2 Duo T8100 CPU, and 2 GB RAM. Windows Vista machine installed.

The Portégé M800 costs from \$ 1,299 to \$ 1,399 (not including VAT).

### **Satellite L300 - a streamlined model at hand**

Satellite L300 costs from 519 to 749 USD. *Photo: Digiworld* .

If you consider the correlation between cost and performance, you should choose the Satellite L300 with the reference price from 519 to 749 USD (not including VAT), depending on the configuration.

This device is equipped with a 15.4-inch mirror screen with Clear Superview technology so the brightness is always enhanced and contrast is enhanced. So when you look at the screen of the L300 series, you will feel the image is more vivid in other models.

The feature of this mid-range machine is nothing special. It is worth mentioning that the device is equipped with DVD-RW burner and graphics chip Intel Graphic Media Accelerator to enhance entertainment performance. The connections that the device supports are Wi-Fi 802.11 b / g; 5 in 1 and 3 USB memory card readers.

### **Portégé R500 - powerful fashion line**

The ultra-thin machine Portégé R500 costs 2,499 USD (without tax). *Photo: Digiworld* .

Appeared in Vietnam a year ago, but now R500 returns with a softer price (\$ 2,499 - not VAT; the old price is over \$ 3,000).

This machine is super slim with a weight of only 1 kg. Even so, the R500 is still fully equipped with 'toys' as thick as a 7-mm optical drive - exactly the same size as an album.

It can be said that the manufacturer did not miss any area on the camera body. At 19.5 mm thick, Toshiba has integrated into 3 USB ports in which 1 port has Sleep and Charge function, allowing charging other devices such as music player, or phone even when it is powered off.

The R500 is equipped with a powerful Intel Core 2 Duo ULV U7700 processor, which ensures stable performance while saving energy.
