

Laptop game configuration 'terrible'

Asus G70 champion of equipment and dedicated design for gamers. Besides, the Gateway P7804G is a good price, the sleek Dell XPS M1730 is also remarkable models.

Asus G70 champion of equipment and dedicated design for gamers. Besides, the Gateway P7804G is a good price, the sleek Dell XPS M1730 is also remarkable models.

Dell XPS M1730 and Asus G70 are equipped with two video cards, which make the price far out of the reach of many gamers. Gateway returned to Asia with a new model with a selling price of nearly \$ 2,000 but still uses a powerful Nvidia GeForce 9800M GTS 1 GB graphics card.

Here are five best gaming laptops on the Asian market at the moment, compiled by Cnet magazine.

Asus G70

G70 has powerful equipment and great configuration. *Photo: PC .*

The G70 is considered a "monster" for gamers, the models of this model outperform the previous Dell XPS M1730. Equipped with two hard drives, two cool fan systems, two graphics cards, 17-inch screen with resolutions up to 1,920 x 1,200 pixels, WUXGA standard, Intel 45nm Core 2 Duo 2.6 GHz or Core processor 2 Extreme 2.8 GHz options.

Currently G70 is not available in Vietnam market, the price in Singapore is over 3,600 USD.

Graphics card: Dual Nvidia Geforce 8700M GT.

Review score 3DMark06: 9,019 .

Gateway P7804G

P7804G has a special design for gaming. *Photo: Cnet .*

This is one of Gateway's "top-notch" models when the manufacturer returns to Asia. The device impresses from the attractive and special design for gamers, in addition, P7804G also has a reasonable price. However, P7804G only has 3 USB ports, the external speaker is not strong and is not equipped with a Blu-ray drive.

Gateway P7804G is also not available in Vietnam, the reference price in Singapore market is 1,880 USD.

Graphics card: Nvidia GeForce 9800M GTS.

Review score D3DMark06: 8.912 .

Dell XPS M1730

The XPS M1730 has an impressive design. *Photo: Trustedreviews .*

This is the most appreciated gaming laptop since late 2007 until the Asus G70 (mid 2008). It has a dedicated design, two powerful graphics cards, an Intel Core 2 Extreme processor and a Blu-ray drive. In addition, the device comes with a backlit keyboard, a second GamePanel LCD screen and a home screen with resolutions up to 1,920 x 1,200 pixels.

Missing pages are HDMI or VGA-out ports, TV-turn.

Reference price: 3,500 USD.

Graphics card: Dual Nvidia Geforce 8700M GT with 512MB

Score 3DMark06: 7,989 .

Toshiba Qosmio X300

The X300 doesn't have a full-HD standard screen. *Photo: Notebookitalia .*

Like most laptops in the list, the X300 also has a strong graphics card, good external speakers, two hard drives, USB charging mode at shutdown and an eSATA / USB combo port. However, the keyboard of the device also prints fingerprints, the screen is not a full-HD standard.

Reference price: 1,600 USD.

Graphics card: Nvidia GeForce 9700M GTS.

Review score 3DMark06: 7,062 .

Asus G50

G50 has a nice and compact design. *Photo: [Mobileztalk](#)* .

Launched before the G70, however, the G50 is still a model worth noting for its beautiful design, large memory. Moreover, despite its average size, a powerful video card, separate key press. However, compared to the next generation, the G50 is still poor because the screen does not have full-HD standard, low battery.

Reference price: 1,800 USD.

Graphics card: Nvidia GeForce 9700M GT.

Review score 3DMark06: 4.915 .
