

Laptop has capacity of 300 kg

When introducing NEC S9100, the manufacturer invited a man of about 65 kg to step on this laptop to prove its bearing capacity.

When introducing NEC S9100, the manufacturer invited a man of about 65 kg to step on this laptop to prove its bearing capacity.

Made in Japan, the S9100 weighs only 1.25 kg and is tested for quality and safety right from the research phase to the technological process. It has an elegant design with glossy black paint.

The screen uses NEC Super Shine View technology with high contrast, sharp images even under sunlight and better white balance. With a size of 12.1 inches placed in a durable magnesium alloy case, it gives the device a smart mechanism between the casing and the LCD screen, helping to avoid the impact of strong impact. Thanks to this mechanism, the product withstands the impact of up to 300 kg and avoids the effects of overheating.

The device is equipped with an additional touch chip free-fall to avoid the risk of data loss when there are sudden shocks because the reader scratches the hard disk is rotating. This sensor, when recognizing any unusual

movement, immediately switches the reader away from the computer's hard disk. In addition, fingerprint security features also enhance support to ensure the safety of important information of users.

Battery life of up to 6 hours of continuous operation.

With the new technology motherboard about 40% smaller than other motherboards, and the Intel Core 2 Duo processor, the small S9100 delivers the power of a large interface laptop.

Not yet announced the official price in Vietnam, but the manufacturer confirmed the device will be at 2,500-3,000 USD.

Product configuration :

- Processor: Intel Core 2TM Duo ULV U7600 (1.2 GHz, 2 MB L2 Cache, 533 MHz FSB).
- Chip: Intel GM965 Express Chipset.
- Screen: 12.1 'WXGA LCD with NEC Super Shine View display technology.
- Magnesium alloy frame design, shiny black casing with NEC logo.
- Graphics card: Intel Graphics Media Accelerator X3100 up to 358MB share Video Memory.
- Memory: 1 DDRII slot, up to 3 GB.
- Hard drive: 160 GB SATA.
- Optical drive:
- Connection: Bluetooth 2.0 + EDR, Wireless AGN LAN and Wired Gigabit LAN, SD card reader.
- 6 cell Li-ion battery.
- Weight: 1.25 kg.
- Operating system: Windows Vista Home Basic.
