

## Laptop integrated high-definition TV tuner

HP's high-end HDX Premium notebook uses the MediaSmart suite of applications to watch and record TV shows.

**HP's high-end HDX Premium notebook uses the MediaSmart suite of applications to watch and record TV shows.**

In addition, the application also helps users create, edit, manage and view videos, digital music, photos, and then easily share via the Internet without installing any additional software.

HDX Premium can also easily connect to a variety of high-end HDTVs or display devices, and replace all Blu-ray players because of this built-in drive.

The 16-inch model costs \$ 1,890.

HDX Premium has a luxurious design, titanium-coated outer shell, the same 'Fluid - Mobile' pattern according to HP Imprint etching technology 2. Screen size of 16 inches or 18.4 inches Ultra BrightView technology , supports high resolution up to 1080p (Full HD standard), and displays vivid color images on a high-end Nvidia GeForce 9650M GT graphics card, Core 2 Duo chip and minimal memory 512 MB VRAM. In particular, the 16: 9 'hot' frame rate gives high contrast and ultra-wide viewing angles to make HDX Premium feel like HD (HDTV) standard TVs.

The 18-inch version is priced at 2,290 USD.

The speaker system has subwoofer sound effects and Dolby surround sound, suitable for lovers of "home theater" style.

In the event of a crash, the HP ProtectionSmart software on the computer will activate the hard disk 'lock' mode, helping to limit data loss. In addition, the new generation eSATA communication port and the HP backup application suite (optional) will quickly backup and restore all data, music, movies and photos.
