Two pages of *Central Station Gadgets and Guermant* allowed to order laptops for the Asus G75 game for \$ 1,450. This product is considered an upgrade of the G74SX model introduced last year.

Asus G75 uses the 2.3GHz Intel Core i703610QM quad-core processor along with Nvidia GeForce GT 660M graphics. It has a 17.3-inch screen with resolutions up to 1,920 x 1080 pixels. It has 16GB RAM along with a 750GB hybrid hard drive. Asus G75's weight is about 3.94 kg. The above model supports DVD burner, HDMI and USB 3.0 ports.

Currently, it is unclear when the official release of G75 will be released. Earlier, a Notebookcheck source said the device will be released in April this year.
