In order to compete in the gaming laptop market with rivals such as Alien Wave or Razer, US company Digital Storm has just launched the X17E gaming laptop that it calls the *"most powerful gaming laptop " today.*

Laptop playing game X17E.

Perhaps this statement will need practical tests to verify. However, one thing is unquestioned is that the X17E's configuration is "*terrific*". Machine equipped with Intel Core i7-3910XM chip can overclock to 4.5 GHz, graphics card GeForce GTX 680M or Radeon 7970M, depending on the choice of the buyer, RAM 32 GB.

Other features include USB 3.0, Blu-Ray drive, keyboard with customizable backlight with 7 colors to suit your own needs. The X17E has a 17-inch 1920 x 1080 pixel screen.

The device will start selling at the end of September with a starting price of 1753 USD (nearly 36.5 million VND). In addition to this basic model, the company will release a special version of Signature Edition with unique drawings on the machine. This version will help your gaming laptop become more prominent. The price of the Signature Edition version will of course be more expensive than the regular version.
