

Laptop playing the 17 inch thinnest game in the world

When it comes to gaming laptops, we often imagine that the systems are thick, bulky and weightless, not ideal for carrying and walking.

When it comes to gaming laptops, we often imagine that the systems are thick, bulky and weightless, not ideal for carrying and walking.

However, it seems that it is no longer true for iBuyPower's gaming laptop duo. Called **Battalion MS1771-1** and **MS1771-2**, these two gaming laptops were advertised as the slimmest 17-inch gaming laptop available today by iBuyPower.

It has a 17.3-inch screen with full HD 1080p resolution (1,920x1,080 pixels). Although the manufacturer did not disclose details of the weight and thickness, the image showed that it was only a bit thicker than a ultrabook.

For specific configuration, **Battalion MS1771-1** is equipped with Intel Core i7 4700HQ chip, 8GB DDR3-1600 RAM, Nvidia GeForce GTX 765 graphics card, 1TB hard drive (7200 RPM), LAN Killer E2200 port, WiFi Killer N1202 2 band, Bluetooth 4.0, and 64-bit Windows 8 operating system. It doesn't have an optical drive, but you can add an external DVD burner for \$ **39** . This laptop has a starting price of **1429 USD**.

The other product **MS1771-2** has a starting price of **1769 USD**, equipped with 16GB RAM, 256GB SSD drive. Currently the manufacturer has allowed to configure and order this product on their website.
