The ranking of 10 best-selling computers in September has the presence of many brands, in which, Acer with 4 positions, Lenovo connected the tail with 2 models.

The upcoming Windows 7 operating system does not affect much on the ranking of best-selling laptops in the Asian market compiled by *Cnet* magazine. The majority of laptops included in the ranking are low-cost models and netbooks, using Windows XP or Vista Home Basic operating systems, but upgrading to Windows 7 costs money.

Here is a list of 10 best-selling laptop models in Asia over the past month.

1. Acer Aspire 4736G (Core 2 Duo P8600 2.4 GHz, 3 GB RAM)
