

# Laptop supports watching the maximum HD movie - Acer Aspire 4738

Acer Aspire 4738 equipped with high-definition HD standard screen using Acer CineCrystal image reproduction technology for high presentation efficiency.

**Acer Aspire 4738 equipped with high-definition HD standard screen using Acer CineCrystal image reproduction technology for high presentation efficiency.**

In addition, the screen has a 16: 9 ratio instead of the previous 4: 3 ratio, making watching HD movies easy and achieving good visual effects. As for the audio, Dolby Home Theater system, there is no noise or sound when opening the audio at maximum capacity. Another very important feature to turn AS 4738 into a home theater is the HDMI port that converts images to large screens such as TVs or projectors while retaining image quality.

Through HDMI port connected to TV, users can now watch high quality movies at home.

The device is equipped with Core i3-380M processor - 2.53GHz, 2GB RAM can be upgraded to 4GB, Intel HD video card - 128MB, and hard drive up to 500GB. In particular, Aspire 4738 is preinstalled with Windows 7 Home Premium copyright, so users can use the new office 2010 stater (Word, Excel).

Acer 4738 comes with a copyrighted Windows 7 Home Premium OS.

The AS 4738 version, priced at VND 11,999,000 (including VAT), is given a backpack, a copyrighted Microsoft software disk "I'm Happy". In addition, you can choose another line of products with the name Acer Aspire 4738-382G50Mnkk.060 with the same configuration but not sold with Windows 7 operating system for 11,190,000 VND.
