SDXC memory cards are up to 2 TB in capacity and while the data output is 300 MB / sec faster than the current SSD solid-state hard drive. SD eXtended Capacity SDXC card exFAT format can hold up to 4,000 RAW 100 HD movies, and record 60 hours of HD resolution. Currently, USB ports are not enough to download 104 MB SDXC memory cards per second, but thanks to the PCI Express slot.

Besides Dell, HP and Lenovo, according to *Electronista* , many other firms have also been interested in the issue, but have yet to rush to disclose information. For example, Apple suddenly put the SD (SDHC-compatible) memory card slot on the iMac and MacBook Pro desktops earlier this year, and now has a lot of upgrades.
