

# Laptop without screen officially launched

This type of screenless laptop is manufactured by the Israeli company Sightful and is called Spacetop. Just need a pair of AR glasses connected to the computer, wherever the user looks, that's the screen.

Spacetop's virtual reality headset will project a screen up to 100 inches, able to display 1080p resolution in each eye. Depending on the purpose of use, users can increase the resolution to bring the screen closer to their eyes or zoom out to zoom out by placing 3 fingers on the touchpad.

This unique laptop runs a proprietary operating system called Spacetop OS, which allows multiple windows to be opened in parallel on a virtual screen called "Canvas".

Spacetop also offers a new privacy mode where only users can see the screen, allowing them to comfortably work in public spaces.

In addition, because the glass is transparent, users, even while using the computer, will not miss what is happening around them.

In terms of configuration, Spacetop is equipped with Snapdragon XR2 processor developed by Qualcomm for personal computers, with 8 processing cores clocked at a maximum clock speed of 3.1GHz. This allows Spacetop to connect to both WiFi and 5G networks. The device is equipped with a battery that lasts about 5 hours for general tasks such as office work, video calling, livestreaming or online gaming.

Spacetop is equipped with 8GB RAM and 128GB storage. Although there is no camera, this laptop still has a built-in 5 megapixel webcam.

The Spacetop OS operating system is developed based on an open source version of Android.

The entire system is 4cm high, 26.6cm wide and 24.9cm deep. The keyboard and glasses combination weighs about 1.5kg. The glasses have built-in headphones.

The advantage of Spacetop is that the product has a compact design but can display large-sized content and ensures absolute privacy because the content is only displayed through virtual reality glasses so outsiders will not know. know what the user is doing or watching on this laptop.

Initial user experiences show that Spacetop is very easy to use and has a large working space. After a period of continuous use, it still does not cause headaches or dizziness for users.

Spacetop has officially been sold on the market at a price of 2,150 USD.
