

Laptops based on Samsung's Montevina platform

Laptops based on the Montevina platform are gradually coming out, and Samsung is the newest member to participate in the Aura laptop.

Laptops based on the Montevina platform are gradually coming out, and Samsung is the newest member to join the Aura laptop with an all-new Eclipse laptop.

Montevina is also called Centrino 2 vPro, an Intel laptop platform that combines Penryn processors with Intel's 4x series chipsets and Intel's wifi technology.

The Aura R510 has a 15.4-inch screen, a 2.53GHz T9400 bus 1066 Core 2 Duo processor with integrated X4500 graphics card, 4GB RAM, dual layer DVD burner and a 320GB hard drive, all available weight 2.2 kg. The desktop replacement Eclipse R710 should be equipped with a 17-inch screen, a Core 2 Duo 2.53GHz P9500 processor and a GeForce 9600M GT 512MB graphics card in a completely new design case. with colorful accents.

Completing the Eclipse line also has two laptops in the ultra portable line Q210 (12.1 inches) and Q310 (13.3 inches). Both are equipped with NVIDIA Geforce 9200M GS graphics card 256MB, 4GB RAM, 320GB hard drive along with a dual layer DVD burner, the difference in size also lies in the microprocessor equipped: uses a 2.26GHz P8400 Core 2 Duo processor while Q310 uses a 2.4GHz processor.

There is still no information about the prices of these laptops.
