If compared to current laptops, the configuration of these laptops only for these giants is nothing outstanding but with a unique design that supports advanced features and the most advanced technology at the time of production. Exported, these super laptops cost from tens of millions to tens of billions of dong. More specifically, most of these laptops can choose the hardware configuration you want to turn them into 'top' rows.

1. Luvaglio

This is the most expensive laptop on the planet priced at \$ 1,000,000 and produced in limited quantities according to orders. Customers can choose material of precious wood, platinum or animal skin. This Luvaglio laptop has a 17-inch Backlit LED display, 128 GB SSD drive and a Blu-ray drive and MP3 player. A special feature of this laptop is that the Power button is attached to a very rare diamond that acts as a boot and security device. In addition, the machine has a built-in self-cleaning device to help users feel more secure when using. When buying a Luvaglio laptop, customers will be presented with a very exquisite precious wooden case, which is handcrafted.

2. Tulip E-Go Diamond

Tulip E-Go is designed for women with the same design as a women's handbag that sells for \$ 355,000. The machine surface is platinum-plated, rubbing rubies on two Tulip logos and thousands of 80 carat diamonds throughout the body. The case is exquisitely decorated with tulips, roses, and animals for buyers to choose from. Hardware configuration is nothing special with AMD Turion 64 processor, 2GB RAM, 160 GB hard drive, DVD burner, 12.1 inch screen size, ATI Radeon Xpress 200 graphics card and support Wi-Fi, Bluetooth connection.

3. MacBook Air Supreme Fire Edition and MacBook Air Supreme Ice Edition

Both versions are fitted with 54 25.5 carat diamonds on the Apple logo. The Ice Edition version has all titanium body and keyboard while Fire Edition is gold. This results in a quite different price, Ice Edition version costs \$ 21,000 while the Fire Edition costs up to \$ 340000. It weighs only 2.6 kg with a hardware configuration including Intel Core 2 Duo processor at 2.13 GHz, 2 GB RAM memory clocked at 1066 MHz, 128 GB solid state drive, NVIDIA GeForce 9400M graphics card. The machine has no optical drive and Ethernet interface. The device was produced in 2010 and each version was released only 10 units by Tuart Hughes.

4. Ego for Bentley

This laptop is inspired by the Bentley supercar of Ego Lifestyle line produced by Tulip Company (Netherlands). The machine is completely hand-assembled with a look that looks like a lady's handbag. The whole machine frame is made of platinum and covered with a high-class leather outside.

It uses AMD Turion™ 64 processor, 160 GB hard drive, 2 GB RAM, 12-inch screen with 1280 x 800 resolution, DVD recorder, 3 USB ports, VGA port, Wi-Fi 801.11 support a / b / g. Ego Bentley was produced in 2008 and uses Microsoft Vista Ultimate 64 bit operating system. To own this laptop, you have to spend an amount of up to 20,000 USD.

5. Voodoo Envy H: 171
