

Large screen laptops worth the money

At the top of the list is Apple's 17-inch MacBook Pro for nearly 55 million. This machine has the most 'configuration' of all laptops for gaming people

At the top of the list is Apple's 17-inch MacBook Pro for nearly 55 million. This machine has the most "configuration" of the laptop for people to play games and graphics.

Laptops of 15 inches or more are considered large screens, and many people are cheaper than small laptops. However, the reality is not so. There are models of 17-inch screen but cost nearly hundred million, this type has the ability to handle powerful graphics, fast speed and of course a big brand.

Apple MacBook Pro MB166ZP / A

The MacBook Pro MB166P / A has a 17-inch screen.

Top of the list is Apple products. This machine is 'expensive to slice'. With nearly VND 55 million, you have a Core 2 Duo T9300 processor, clocked at 2.5 GHz, with 6 MB L2 Cache cache. It has a 250 GB hard drive, a rotation speed of 5400 rounds per minute.

The screen of this machine is large (17 inches), the resolution is 1,680 x 1,050 pixels, so the image is very smooth and beautiful. High-end Nvidia GeForce 8600 GT graphics chip ensures fast image processing as desired.

MacBook Pro is suitable for gamers and designers.

HP Pavilion dv9808TX

Also with a 17-inch widescreen like the MacBook Pro, the price is only two-thirds (about 33 million dong), DV9808TX is a little less than Apple's machine. It is equipped with a 2.4 GHz Core 2 Duo T8300 processor, 3 MB L2 Cache cache. Hard drive of 320 GB capacity, rotation speed of 5400 rounds per minute.

The graphics processor on dv9808 is also a new type - Nvidia GeForce 8600, DDR 512 MB chip. Like MacBook Pro, the device is suitable for gamers and graphics people.

HP Pavilion dv6728TX

Dv6728TX screen is only 15 inches.

This product was introduced in Vietnam market from the end of last year and is still expensive. It has a super-bright mirror screen but only 15 inches with features suitable for business people rather than gaming people.

The dv6728TX processor is Core 2 Duo T7250, clocked at 2 GHz, 2 MB L2 Cache cache. Graphics chip is still Nvidia GeForce 8400M.

Reference price: VND 27 million.

Acer Aspire 6920G Gemstone Blue

The device belongs to Acer's high-end entertainment line with a 16-inch screen, next to the 18-inch 8920G model. Overall, the 6290G is quite good - with a Core 2 Duo T8100 processor, clocked at 2.1 GHz, 3 MB L2 Cache cache. 320 GB hard drive, rotation speed 5300 rounds per minute.

It uses Turbocache Nvidia Geforce 9500M graphics processor, supports Direct X10, so it is quite suitable for gamers and designers.

Reference price: 25 million VND.

Compaq Presario V6507TU

Compaq Presario V6507TU 15-inch screen. *Photo: MH* .

At the bottom of the table is a Compaq Presario line machine. This product is not suitable for the above four models in terms of features, but in return, the reasonable price - affordable of the majority of consumers (22 million).

However, you don't have to worry too much if you want to choose V6570TU because it owns a good speed processor: Core 2 Duo T7100, 1.8 GHz, 2 MB L2 Cache cache. HDD hard drive capacity of 120 GB, 5400 revolutions per minute. The graphics chip is Intel Graphics Media Accelerator X3100 and has no webcam.
