

Latest images of iPhone X, iPhone X Plus next generation, iPhone 6.1 inch, 4GB RAM and 2 batteries

Recently Ming Chi Kuo has just shared the following predictions about the iPhone X, iPhone X Plus and a lower-priced iPhone X with a 6.1-inch screen, due to be released later this year.

Analysts from KGI Securities Ming Chi Kuo often share a lot of information from Apple suppliers in Asia. He recently shared the next predictions about the iPhone X, iPhone X Plus and a lower-priced iPhone X with a 6.1-inch screen, expected to be released later this year.

The all-new 6.1-inch iPhone uses an LCD screen

With the new version completely

1. Taiwanese companies Pegatron, Foxconn and Wistron will be the main units responsible for assembling the iPhone 6.1 inch, and the EMS electronic production services are divided respectively 60%, 30% and 10%.
2. Japan Display will provide about 70% of LCD screens for iPhone 6.1 inch. The possibility that Apple will use Japan Display's Full Active LCD screen because it only has a 0.5mm thin bezel at four sides.

With improved version

1. Designed almost full screen, there is no Home key and TrueDepth sensor set slot.
2. There are 3D sensors for Face ID and Animoji.
3. Batteries are rectangular, 2,850 to 2950 mAh, up to 8.5% higher than iPhone X, mainly due to the smaller board due to advanced production technology.
4. Prices are lower, from \$ 700 to \$ 800 in the US.

The 6.1-inch iPhone is said to be a cheap iPhone X, a little changed in terms of design. Kuo said before that it will have an aluminum frame, no 3D Touch and the rear camera is a single camera instead of a dual camera, only 3GB of RAM (lower than other 2018 iPhones).

Next generation iPhone X and iPhone X Plus

According to Kuo, the second-generation iPhone X and the larger 6.5-inch version called the iPhone X Plus will have 4GB of RAM. With a larger size, iPhone X Plus will also have 3,300 to 3,400 mAh battery, 25% more than iPhone X.

Photos of iPhone X Plus up against the current iPhone X

Apple will use 2 batteries, the L-letter design for iPhone X and iPhone X Plus instead of a L-word battery only increased by about 10%.

Besides the above information, these products do not have a lot of significant upgrades. Kuo does not think that improvements to TrueDepth will be released sooner than 2019.
