

# Latest iOS 17 wallpapers, stunning iOS 17 wallpapers.

Users can download iOS 17 wallpapers from various online sources. But the quickest way is to scroll down below to download the official iOS 17 wallpaper pack.

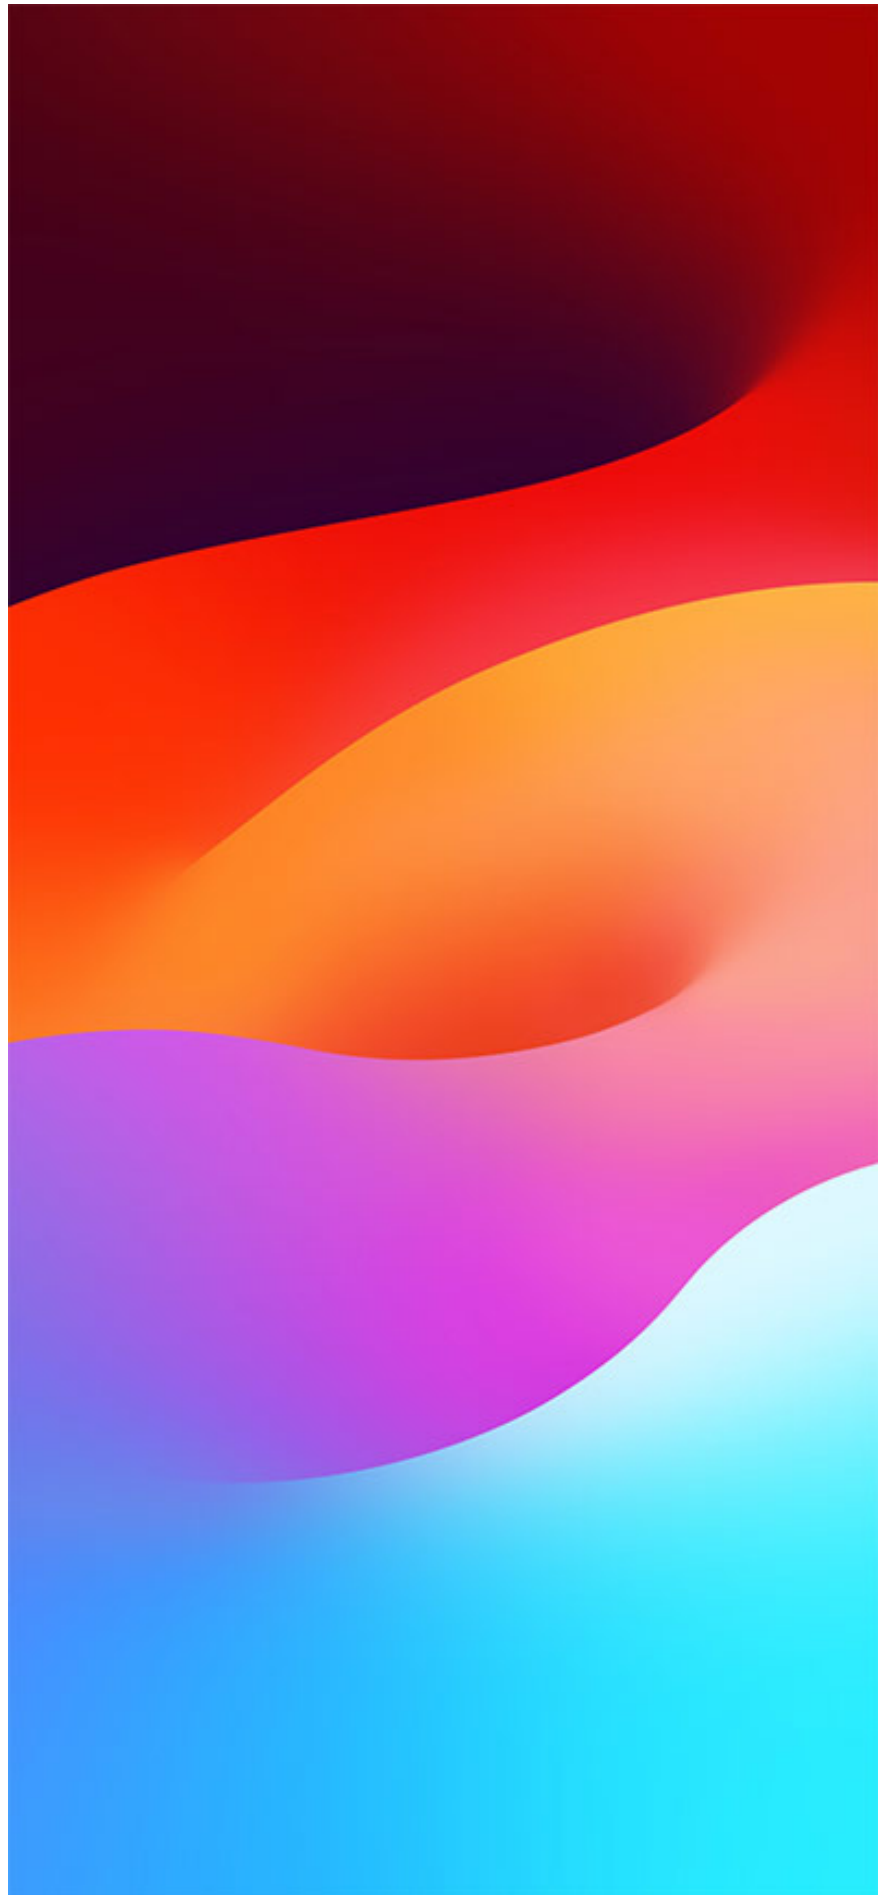

Apple has officially released the iOS 17 update for all iPhone devices . iPhone users can now experience a host of new features in this operating system. However, as with many other iOS updates, users still seem hesitant to update to the first version of iOS. They will have to wait a while longer before updating. However, you can immediately start using these iOS 17 wallpapers.

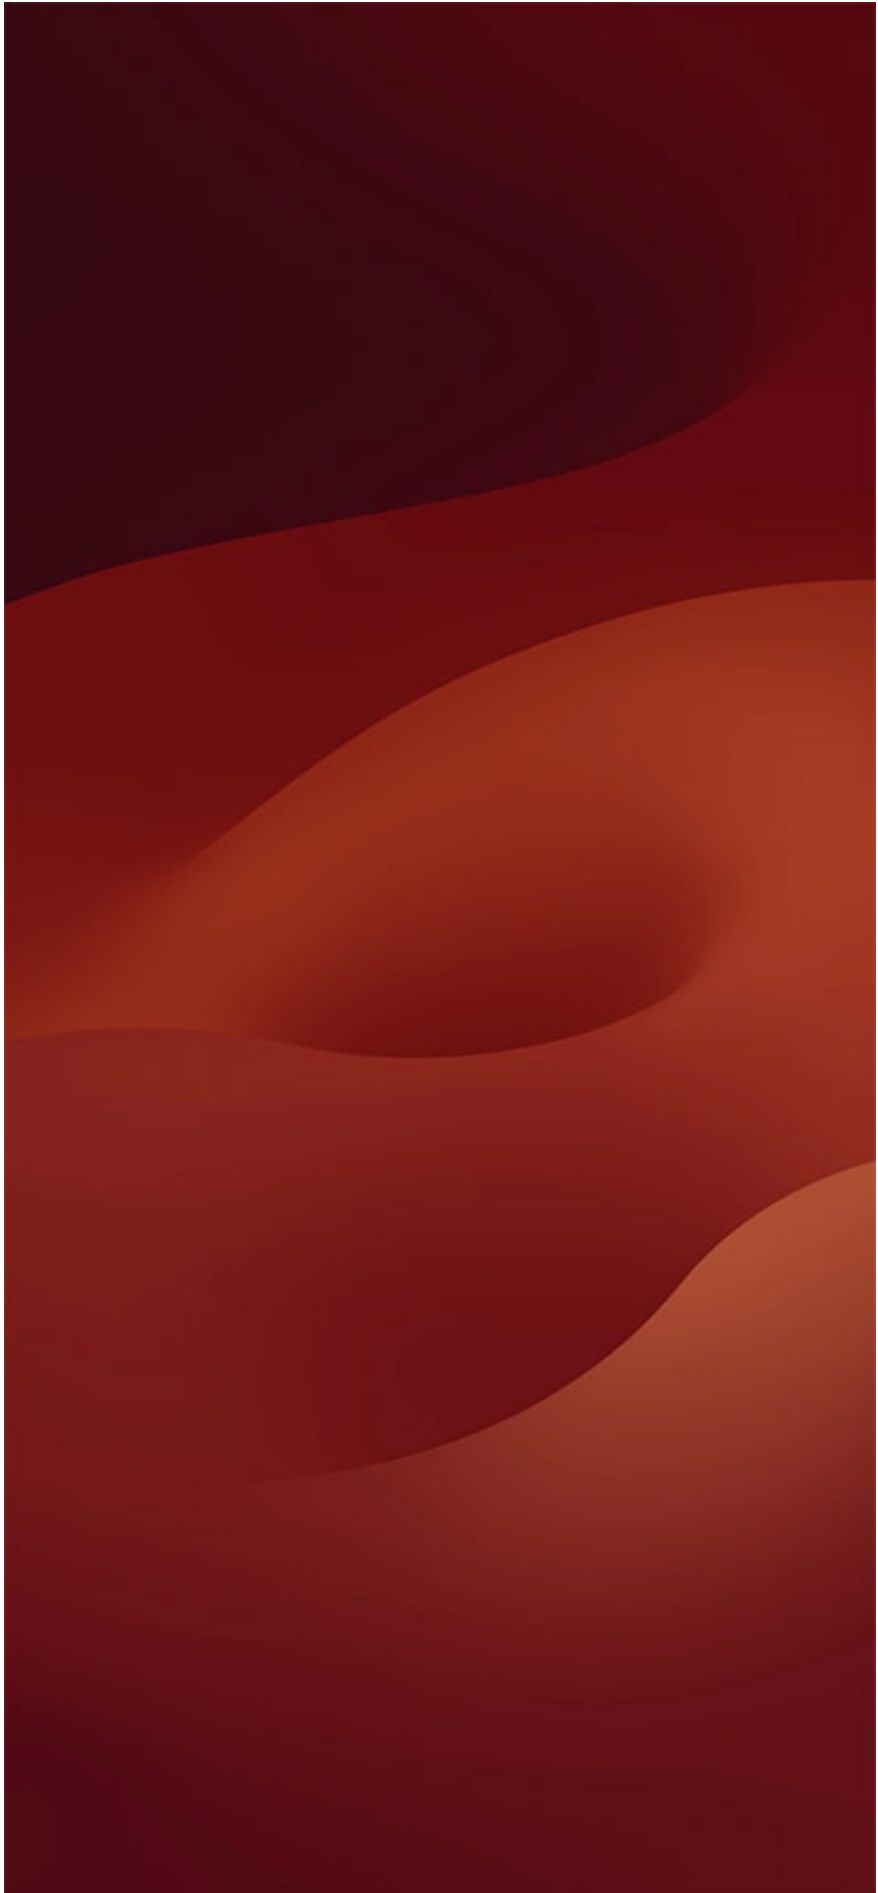

iOS 17 has two default wallpaper sets, one light and one dark. Both wallpaper sets feature abstract designs with color gradients in various shades such as red, orange, pink, and blue.

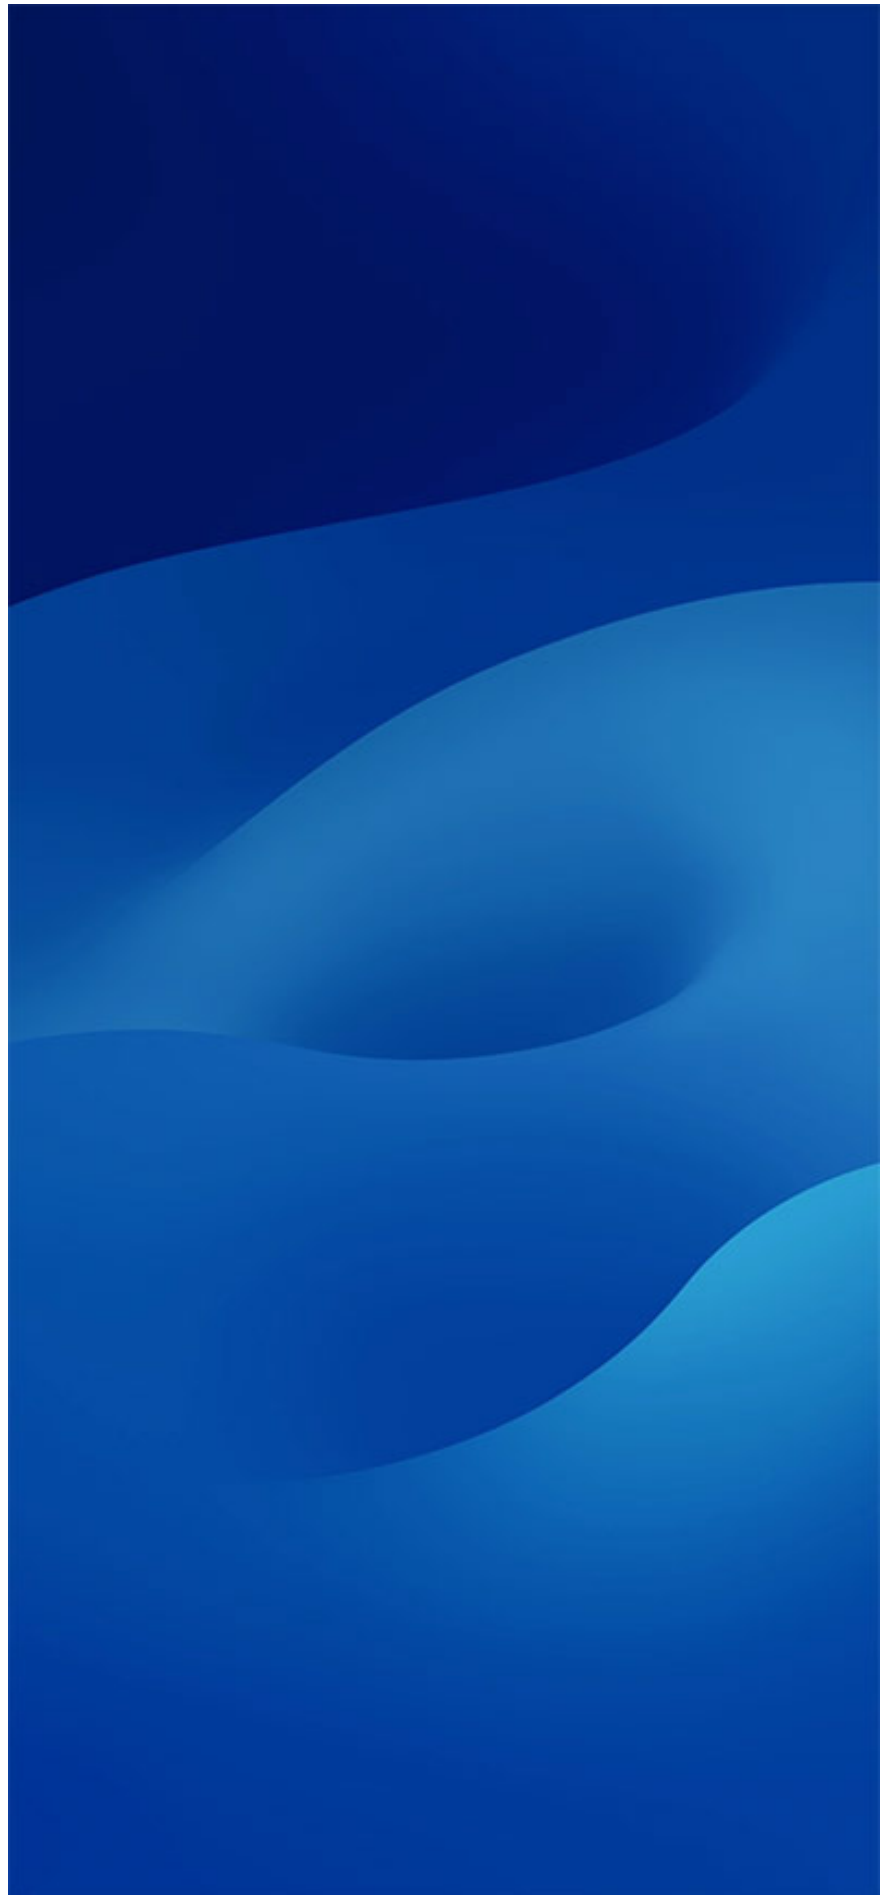

Additionally, iOS 17 also features a new set of astronomical wallpapers, including images of many stars in the solar system. Users can download iOS 17 wallpapers from various online sources. However, the quickest way is to scroll down below to download the official iOS 17 wallpaper set.

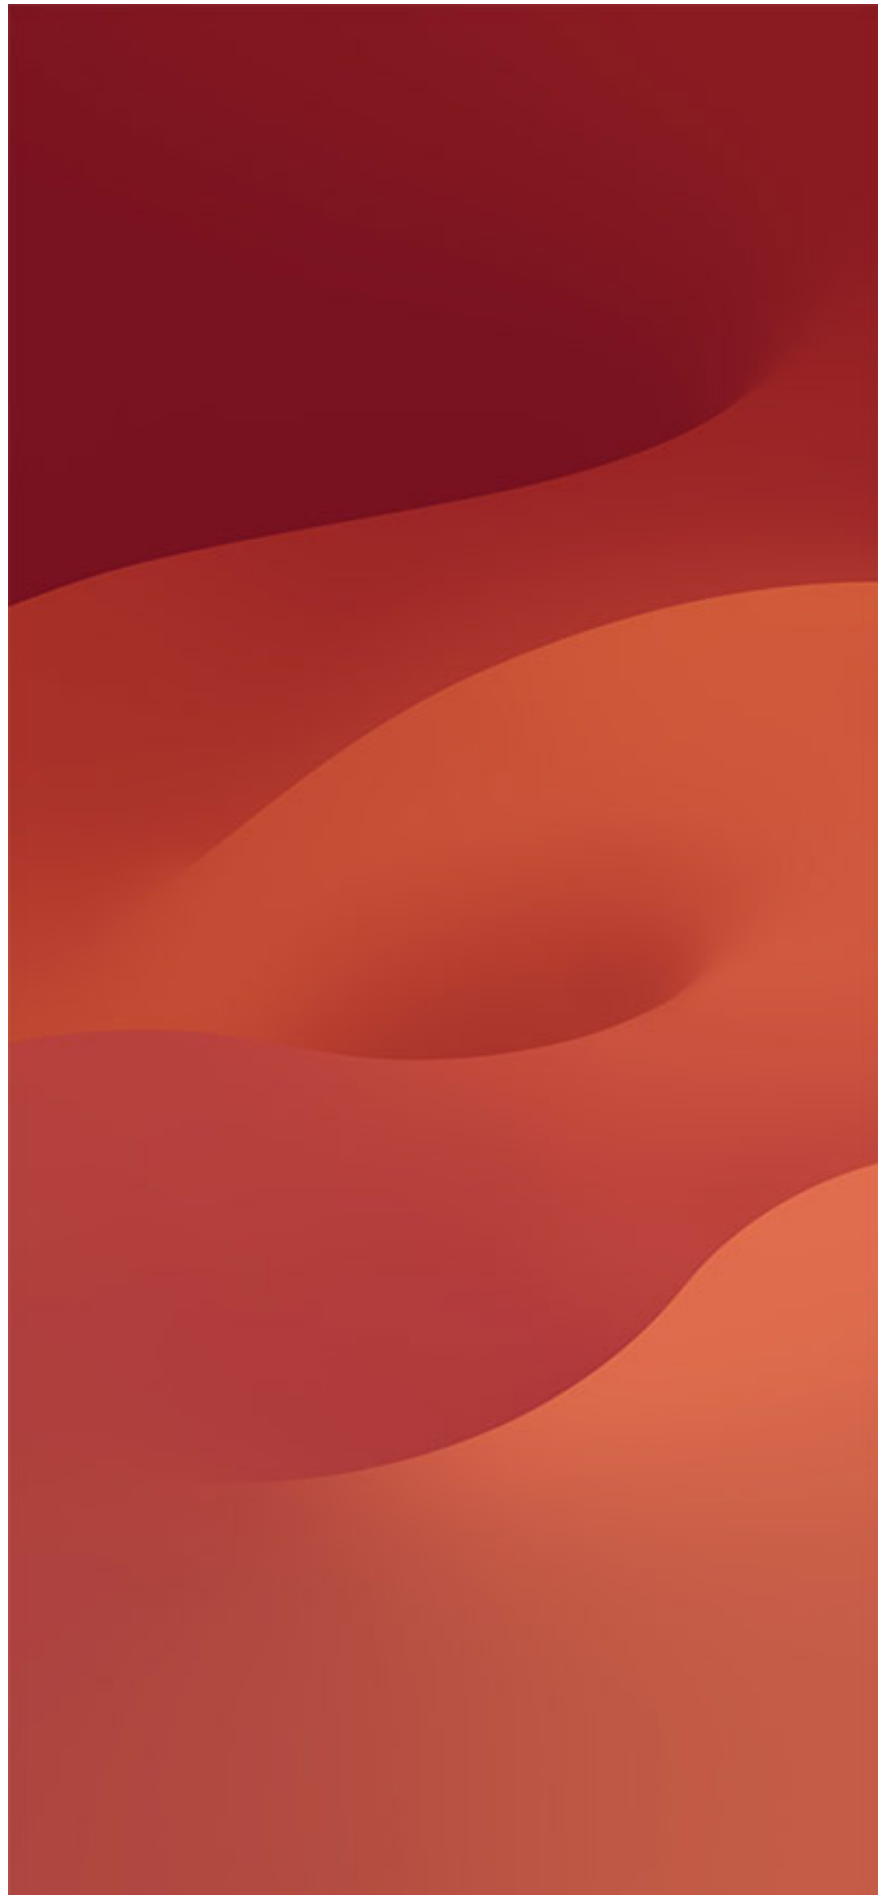

## Download iOS 17 wallpapers.

Please note that the wallpapers below are resized for your reference. The iOS 17 wallpapers will have a larger file size and are compressed into a .zip file. Scroll down to download the iOS 17 wallpapers in their default resolution.

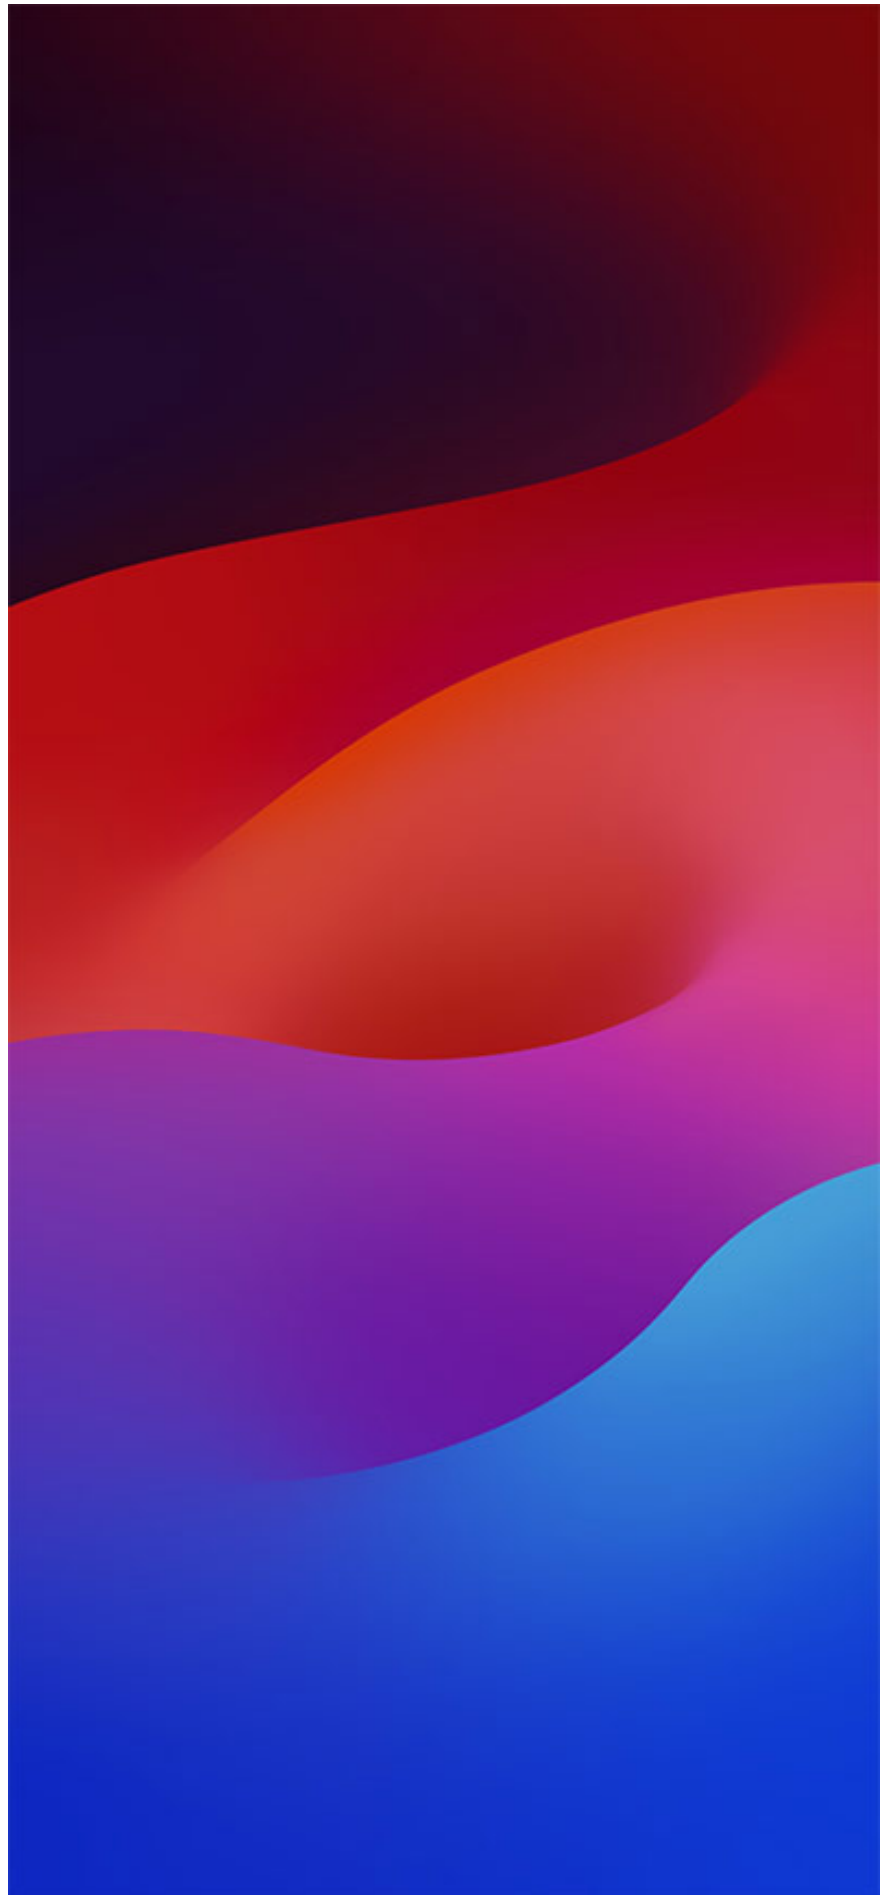

Download link for iOS 17 wallpapers

Overall, iOS 17 wallpapers are highly rated for their design and aesthetics. The default wallpapers feature beautiful and modern abstract designs, while the astronomical wallpaper set boasts stunning and vibrant imagery.

However, some argue that the iOS 17 wallpapers are still quite simple and lack creativity. Some users wish Apple would offer more wallpaper options with a wider variety of styles. Overall, the iOS 17 wallpapers offer a fresher, more modern, and more interesting look compared to previous versions.

Besides iOS 17 wallpapers, you can also download wallpapers from various other sources. Users can download wallpapers from wallpaper-supporting apps on the App Store or websites specializing in wallpapers. This allows users to choose wallpapers that suit their preferences and style.
