If you encounter an error when entering the code

You should also note that you can only enter 1 code once per account. If you enter the same code twice on one account, the system will report a duplicate code error. In addition, please enter the characters in the code correctly, from upper case, lower case and even special characters that sometimes appear in the code.

And if you enter an expired code, you will not be able to redeem the reward, because the game code is released but the developer does not say how long it will last. Therefore, the only way to know the validity period of the code is to enter the code into the game to redeem the reward. If the code is expired, you will receive a notification that the code has expired.
