

# Latest Second Piece code and how to enter code

Second Piece is a third-person action-adventure game on the Roblox platform, inspired by the famous manga and anime series One Piece.

Like the Blox Fruit code or King Legacy code, you also receive rewards from the Second Piece code, but the game code requirements will be a bit different from other Roblox games.

4. **!code ihatechxmei** —Redeem this code for rewards
5. **!code ihatesecondpiece** —Redeem this code for a reward

## How to enter Second Piece code

**Step 1:** In the main interface, select the icon to open Roblox's chat frame in the upper left corner.

**Step 2:** Enter all valid codes in the code list above into the chat box and select Enter to enter the redemption code.

**Step 3:** Usually the Second Piece code will require the player to reach a certain level, usually 7500 or 5000 level to receive rewards from the giftcode. But if you do quests, you will level up quite quickly and after returning a quest, you will gain a few dozen levels. Or killing a monster will help you gain a few levels.

**Step 4:** If you use codes that require a certain level, most of the current Second Piece game codes will require a high level to be able to redeem rewards from the giftcode.

## Where is Code Second Piece obtained?

The simplest way is to save this website, we will regularly update the game code for you to redeem rewards. Save it in the bookmarks bar of Coc Coc and Google Chrome browsers or leave the page a tab on mobile browsers to check back every day.

Second Piece also has social networking sites for players to follow and receive information. It contains not only the game code but also information related to game updates or when changing any content in the game.

If you join groups, the player community is also where you receive Giftcode. You can also share your gaming experiences and collect valuable experiences shared by players on the group.

## What if you can't redeem the Second Piece code?

There are a few reasons why you cannot redeem the game code to receive rewards. Most of the reasons why you cannot redeem the code will be because the code has expired. Besides, you will also have a few reasons why your code cannot be redeemed, including:

1. **Entering the wrong code:** In case you cannot copy the code in the code list above, please enter each code letter to redeem the reward.
2. **That code you have already entered:** A code can only be entered once for one account. If you enter a series of codes at once, you may not remember that you entered that code the next time you enter it.
3. **Unstable internet connection:** Make sure you have a stable internet connection before entering the code. If you change the code in an unstable Internet situation, the system will definitely report an error and you will have to re-enter the code
4. **Roblox server error:** Server error may prevent you from entering code. Try again later or contact Roblox support.

Code Second Piece allows players to receive gems and rolls, however the game developer will require players to level up to be able to redeem the code.
