How to enter the ZZZ code in the game

Quick guide

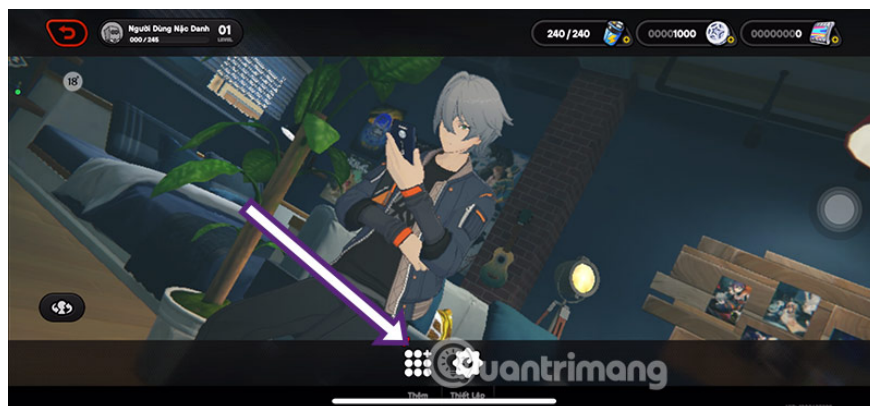

1. Open the in-game menu by clicking the icon in the upper left corner.
2. Select "More" from the menu options.
3. Next, select the "Redemption Code" tab.
4. Enter the entire code from your code table into the code input box and select "Change" to complete the code change.

Detailed instructions with pictures.

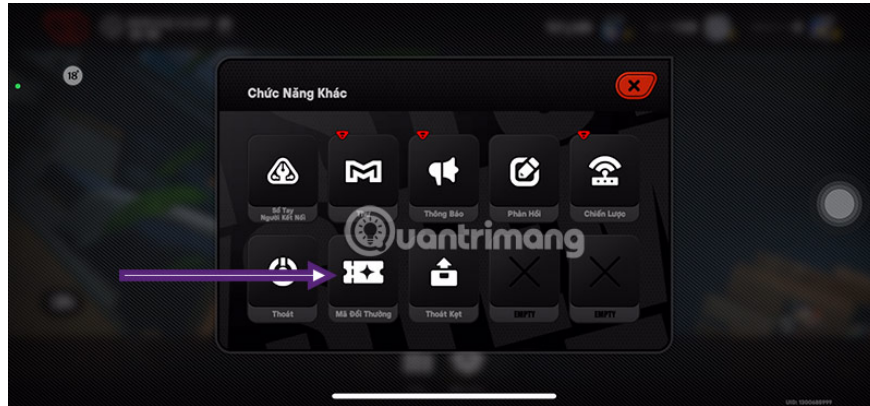

Step 1: First, after completing the initial task, select the settings button in the upper left corner as shown in the image below.

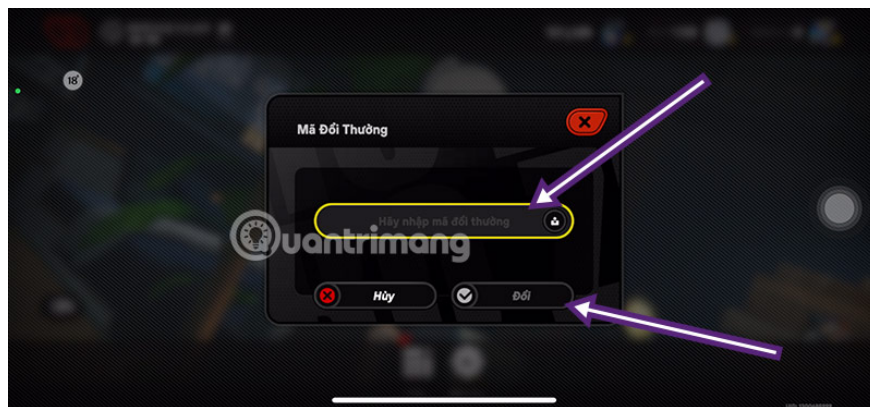

Step 2: Then select Add.

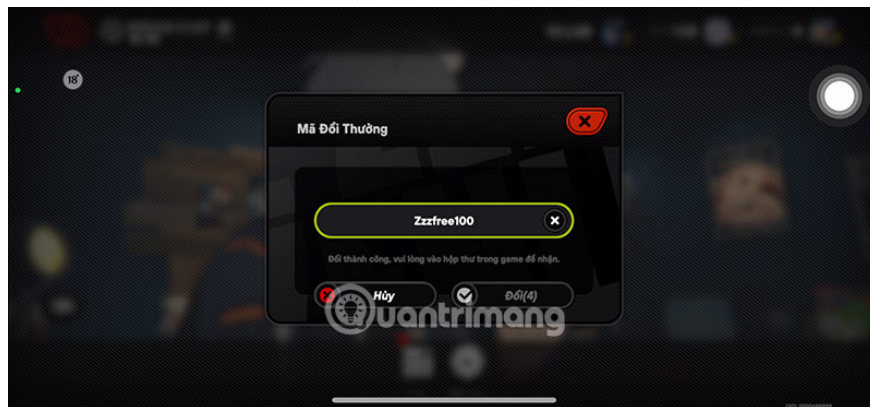

Step 3: In the function menu, select the Redemption Code icon.

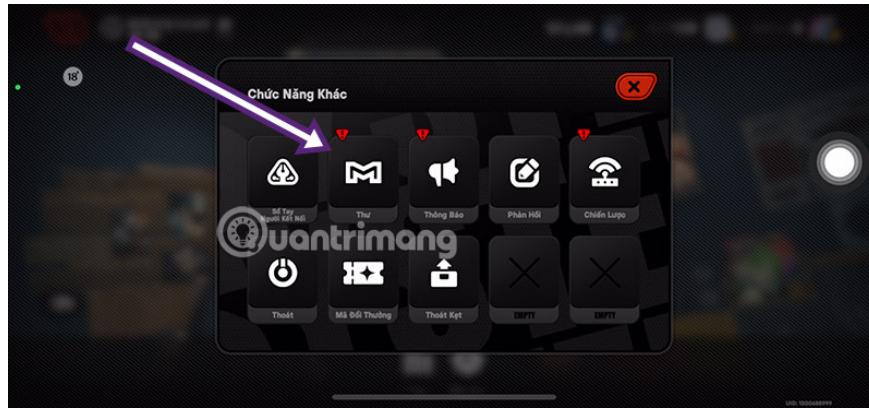

Step 4: The redemption table will appear. Enter all the codes from the table above into the code input box and select Redeem below.

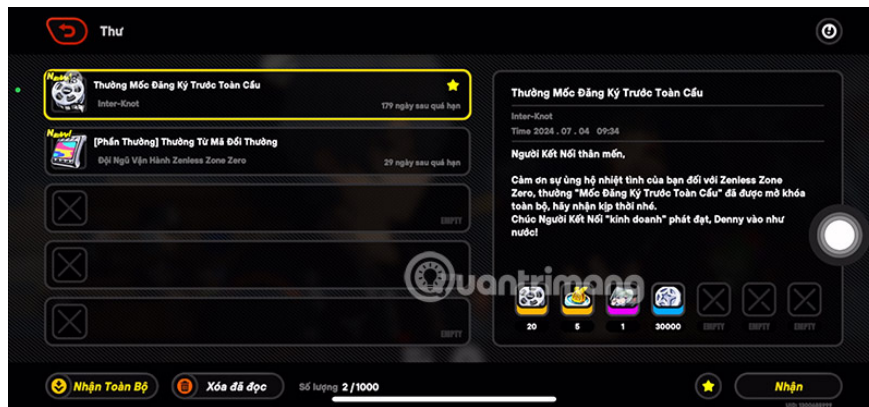

Step 5: If the code you entered is still valid, you will see a "Redeem successful" message; please check your inbox to receive it.

Step 6: Return to the game's main interface and select "Mail" to check all emails sent from the game publisher.

This folder contains emails from the game developer, including update notifications, event emails, game maintenance notifications, reward emails, and gift emails from the game publisher. Giftcode emails will have the title " **Rewards from Redemption Code**". Select "Receive All" to receive all the rewards included in the email.

For those who don't know, miHoYo usually holds livestreams every 6 weeks to introduce new content in game updates. This includes new events, quests, and characters.

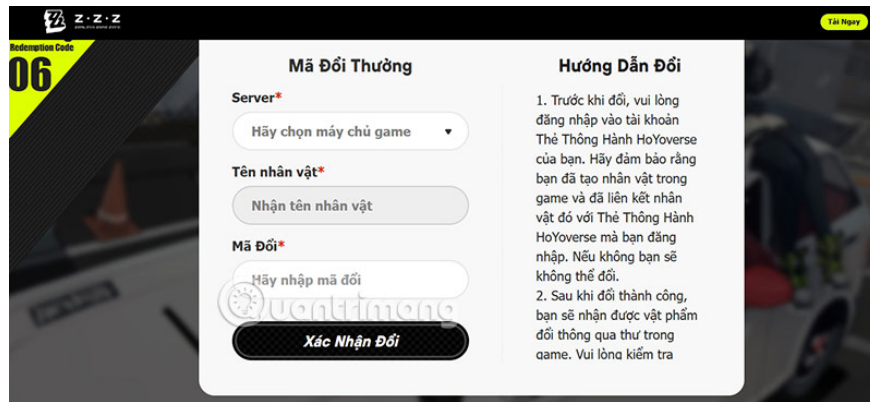

To encourage players to watch, they also provide livestream codes that can be exchanged for a free amount of currency, which can be used to summon agents.

Regarding new characters, this time we'll have Harumasa and Miyabi, characters long awaited by the community. Both will join Section 6 alongside Soukaku and Yanagi. As usual, TipsMake will update this code in the guide when it's announced live during the livestream. However, remember to redeem the code as soon as possible, as livestream codes usually expire within a few days.

Enter the code on the website.

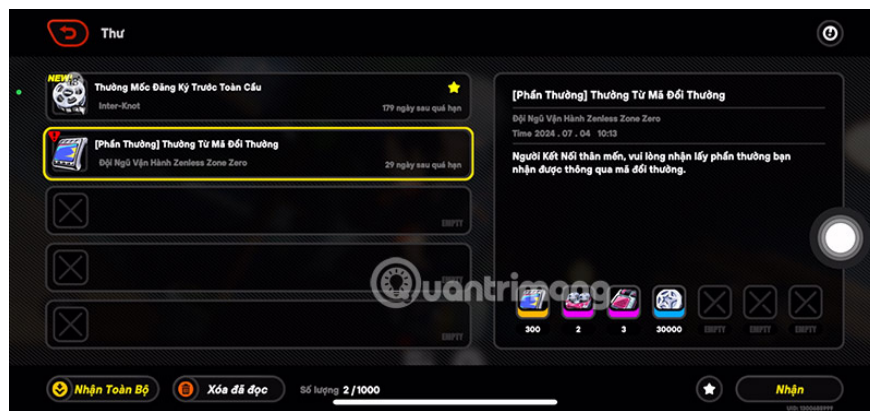

<https://zenless.hoyoverse.com/redemption>

Access the link above and log in to your game account, select the server, enter the character name you want to receive the reward from the gift code. Then enter the entire code that is still valid into the Redemption Code field and select Confirm Redemption.

Where can I get more codes?

If you want to receive more codes, the simplest thing to do is bookmark this page and check back every day. TipsMake.com will update the codes for you daily if the publisher releases reward codes regularly.

Alternatively, you can obtain codes from the developer's official website. Pages you should follow for information include the official miHoYo developer website, the official miHoYo fan page, or the Zenless Zone Zero fan page.

They not only share the latest gift codes and events with reward codes, but they also share other game-related information, such as new content updates, maintenance schedules, lists of cheating accounts, etc.

Error entering redemption code?

Usually, if you encounter an error, the most common reason you can't redeem a code is that the code has expired. Game codes are released, but game publishers rarely specify how long they are valid. Therefore, if you don't update your codes regularly, they will expire, and you won't know when they expired.

Additionally, if the game code is case-sensitive, you must enter it exactly as requested by the game publisher. If you do not use the correct uppercase and lowercase characters, the system will not redeem your reward.

And finally, if you redeem the same code twice, the system obviously won't be able to help you. Each code can only be redeemed once per account, and usually, characters on different servers won't be able to redeem the code if you've already redeemed it on another character.
