

'Laughing out of tears' topped the list of the 10 most popular emojis in the world

Recently, the Unicode Federation - which manages the setting of international standards for characters, for the first time in history published a list of the 10 most frequently used emojis in the world.

Recently, the Unicode Federation - which manages the setting of international standards for characters, for the first time in history published a list of the 10 most frequently used emojis in the world. Accordingly, 'laughing out loud' is the most used symbol globally.

One of the factors used by the Unicode Federation to determine which emoticons are used the most is frequency.

Statistics of frequency of using emoticons of Unicode Association. Photo: Unicode Federation

The Unicode Federation said that this list of the 10 most used emojis will help those who want to propose new emojis. Emotions that are frequently used will be approved by the federation.

The list of the 10 most used emojis is federated by the federation based on average frequency across multiple platforms. In particular, the emoji characters with different skin color, gender are counted as one, the new emojis do not have high rankings because it takes time to be present on all platforms.

Here are the 10 most popular emojis in the world according to the Unicode Federation statistics, invite you to follow.
