

Launch Nokia 2.3, 4000 mAh battery, dual camera, Helio A22, 2GB RAM, price 2.6 million

Nokia has officially launched Nokia 2.3, its cheap Android One smartphone, which will be sold in Vietnam from December 9.

Nokia has officially launched Nokia 2.3, its cheap Android One smartphone, which will be sold in Vietnam from December 9. Nokia 2.3 has 3 colors: emerald, sand yellow and graphite gray, sold for 2,590,000 VND.

Nokia 2.3 has a simple design, the shell is made of plastic with stripe lines for easy handling. The screen of the device is 6.2 inch 720pp. It has a dedicated hardware button for the Google Assistant that is located on the side of the device.

About configuration, Nokia 2.3 owns MediaTek Helio A22 chip, 2GB RAM, 32GB of internal memory, expandable via microSD card. This budget Nokia phone supports dual SIM, Wi-Fi 802.11n, microUSB, Bluetooth 5.0, FM radio and 3.5mm headphone jack.

The selfie camera has a resolution of 5MP f / 2.4, which is placed in the water droplet section. The dual camera on the back includes a 13MP f / 2.2 main camera and a 2MP secondary camera for depth measurement. The rear camera of Nokia 2.3 has been added with Recommended Shot, a new feature that automatically takes 15 photos before and 15 photos after you press the shutter button to choose the best photo.

Nokia 2.3 is equipped with a battery with a capacity of 4000 mAh, can operate for up to 2 days, does not support fast charging.

1. Xiaomi Mi MIX 4 shows the dual selfie camera hidden under the curved screen
2. DIPLÉ, a tool that turns a smartphone camera into a microscope, can detect bacteria
3. CastAway, an accessory that turns your smartphone into a folding screen in a flash, costs just over 3 million
