

Launch of Brawl Stars, a fun, completely free 3v3 shooter on iOS and Android

Brawl Stars, a fun 3v3 shooter developed by Supercell, the famous mobile game maker, promises to bring exciting entertainment moments to players.

Brawl Stars, a fun 3v3 shooter developed by Supercell, the famous mobile game maker, promises to bring exciting entertainment moments to players.

Unlike Clash of Clans or Clash Royale, attractive games are also produced by Supercell, in Brawl Stars players will not build bases or participate in territorial wars. You and two other players will form a group and participate in a gunfight with a group of 3 other players around the world with a top-down view.

Brawl Stars has four game modes including:

1. Bounty: The victory belongs to the team that collected the most stars at the end of the match.
2. Smash & Grab: The team that collects 10 Crystals from the center of the map wins.
3. Heist: Fighting antagonism.
4. Showdown: 10 players fall into a map, the winner is the last survivor.

Players will choose for themselves a character (called Brawler) among the game characters provided to control. Each Brawler has completely different shapes and skills for players to choose according to their play style.

The player helps the Brawler become stronger by collecting gold after each battle to unlock, upgrade Brawler's costumes and stats. If your Brawler is killed, all the stones you collect will be dropped and may fall into the opponent's hand.

With Brawl Stars, players will experience dramatic, fast-paced 3v3 matches. To win, players not only need to have high skills but also need to know how to team with teammates.

Brawl Stars promises to be a mobile game super product in the future. Currently, the game has a version for iOS and Android, players can download it completely for free and experience.
