

# Leaked images and information about Samsung Chromebook 2

The @evleaks account has just posted an image that is said to be the next generation of Chromebooks produced by Samsung with the name may be Samsung Chromebook 2.

**The @evleaks account has just posted an image that is said to be the next generation of Chromebooks produced by Samsung with the name may be Samsung Chromebook 2.**

The leaked image shows that Samsung Chromebook 2 is quite elaborate in terms of design and especially the back of the product will be covered with a faux leather material like Galaxy Note 3.

Although @evleaks did not reveal anything more about the configuration of the product, another source close to Samsung said the Chromebook could be a Samsung strategy to expand product market share using hardware details due to Samsung main design.

Specifically, Samsung will release two versions of Chromebook 2 with 11.6-inch and 13.3-inch screens. In particular, the 11.6-inch version will use Exynos 5 VXL, 4 GB RAM and 16 GB internal memory; The 13.3-inch version will use Intel's VXL.
