## Close-up photos

This motherboard seems to be equipped with a relatively complete range of modern gadgets, commonly found on midrange and above motherboard models, including:

1. 4 RAM DIMM slots
2. Power delivery system (power delivery system) 8 + 2
3. Radiators cover VRM, PCH and PCIe areas
4. 3 M.2 slots (2 for SSD and the other for network cards)
5. 5.1 audio output
6. USB-C

In recent times, there have been many rumors that Lenovo plans to penetrate the motherboard market, participating in direct competition with rivals such as ASRock, ASUS, Gigabyte and MSI. However, it is not excluded that Lenovo only plans to use the above motherboard models in its future OEM PC builds.

If you don't already know, Lenovo is currently selling a number of desktop gaming PCs with pre-configured configurations branded as 'Blade'. Not long ago, the Chinese manufacturer also made a big deal with the launch of Savior Blade 7000 UIY - the PC Gaming system was integrated with a huge hardware configuration, but the price was very pleasant, only at about 6,999 yuan (equivalent to 23 million), and will be sold from April 18 here.
