

Learn 8 online hacker training programs for only 39 USD

Because personal data, widely publicized security vulnerabilities are becoming increasingly popular, moral hackers, or white-hat hackers, are being hunted by businesses to help them maintain. Maintaining network and data security.

Because personal data, widely publicized security vulnerabilities are becoming increasingly popular, moral hackers, or white-hat hackers, are being hunted by businesses to help them maintain. Maintaining network and data security.

So it is not surprising that white-hat hackers, intruders and information analysts have become the highest-paid employees in the current IT workforce. There are many jobs for people with "ethical" hacking skills. If you are interested in learning about this, but do not know where to study, an online course can be a good solution to this problem.

And the good news is that THN Deals has brought a comprehensive online course from AZ for those who want to be "ethical" hackers - Ethical Hacking A to Z Bundle, so you can start to learn, no matter what. any level of experience.

Ethical Hacking A to Z Bundle will guide you with the most essential skills to become a professional Ethical Hacking. 45 hours of study with 384 intensive lectures will usually cost about \$ 1,273, but you can get this course for only \$ 39 (after receiving a 96% discount) at the THN Deals Store.

This is what you will learn in this training:

1. Ethical Hacker Boot Camp for 2017

This course will teach everything about passive and active exploration, scanning, enumeration (enumeration), basic issues of social networking techniques, network mapping, online hack teaching using tools like Maltego, FOCA, Harvester, Recon-ng, Nmap and Masscan.

At the end of this course you can think like a hacker and get the full preparation for the Ethical Hacking Certification exam.

2. A to Z Ethical Hacking Course

This course will introduce you to the basics of advanced hacking techniques and all the ways to hack. It allows to practice hacking techniques such as SQL insertion, injection. phishing, cross-site scripting, email hacking, teaching how to use tools like Metasploit, Keylogger, and WireShark.

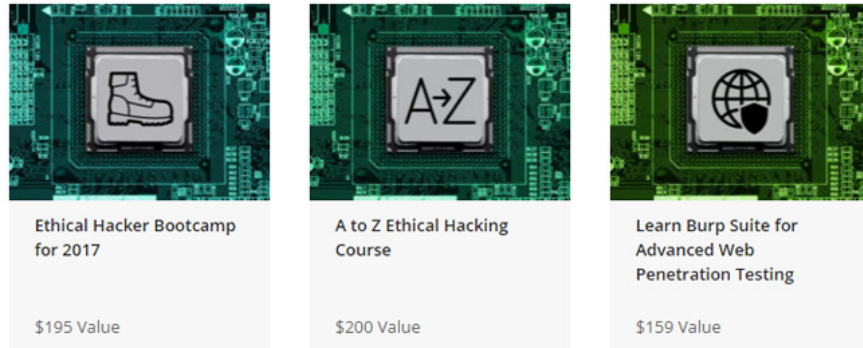

At the end of this course you can take on an Ethical Hacking job with a relative salary.

3. Learn Burp Suite for Advanced Web Penetration Testing (Learn Burp Suite for advanced web access)

The third course will teach you how to use Burp Suite, a Java-based software suite to perform security checks on web applications and how to use Burp to automate some of the most attacks. determined.

Burp gives you total control, allowing combining advanced manual techniques with advanced automated systems to work faster, more efficiently and more interesting.

With this course, you will learn about different web attacks by targeting OWASP Web Goat-based testing environments, a vulnerable web application, used to practice skills. security techniques.

4. Complete Ethical Hacking / Penetration Testing Course

Complete Ethical Hacking / Penetration Testing Course will help you discover the art of Penetration Testing and Ethical Hacking. It offers a simulated penetration testing process, from information gathering, counting, vulnerability scanning, vulnerability exploitation and vulnerability disclosure.

At the end of this course, you can find and exploit security vulnerabilities in applications, web services manually or use automated scanning tools.

5. Intro to Ethical Hacking Certification (Introduction to Ethical Hacking Certification)

This section will briefly introduce Ethical Hacking and how to be successful in the IT industry when the workforce in this industry is being cut. Because the demand for security professionals is reaching its highest

level so far, you must have a comprehensive knowledge of security, hacking and this course will help you do that.

6. Real World Hacking & Penetration Testing

In addition to the updated penetration testing techniques, in the 5 hours of this course you will learn all the tools and techniques that an "ethical" hacker should have, from attacking vulnerabilities on computers, networks, web applications to explore Darknet and wireless attacks (wireless attacks).

7. Learn Kali Linux and Hack Android Mobile Devices

This course provides you with the necessary knowledge about Kali Linux - one of the popular hacker operating systems, comes with over 300 penetration testing, forensic, hack and island testing tools. reverse with the hack capabilities of the operating system. [How to install and use Kali Linux on VmWare virtual machine]

Moreover, most important data is now often stored on smartphones, so network hackers often target these devices to steal personal information, especially Android, mobile operating systems. The world's most popular dynamic.

Besides Kali Linux, this course also teaches how to attack smartphones and Android tablets, discover ways to deal with each type of attack to protect the device from hackers.

At the end of this course, you can effectively use valuable mobile device hacking tools such as Netcat, Ettercap and NMAP; set up Virtual Machines, workspace and Android platform, working with Metasploit and Armitage.

8. Learn How to Pentest using Android from Scratch

This final course is quite interesting, it helps you avoid many common attacks using Android devices.

Basically, it's a penetration test with Android. This course will help install NetHunter and Kali Linux on Android devices to perform penetration testing, using Android devices to access any account accessed by devices in the network, creating access points. Counterfeit access in the network and monitor all data sent to Android devices, discover several methods of exploitation to gain control over the entire target machine, discover methods to detect ARP Poisoning Attacks.

In short, this online course uses Android as a tool for penetration testing, using actual attack scenarios, thus giving you total control over multiple computer systems.

At the end of the course, you will know how the attacks work, how to launch an actual attack and how to detect and prevent that type of attack from happening.

How to attend this online training course?

All that impressive course needs is only \$ 39. To enroll, go to this address: <https://deals.thehackernews.com/sales/it-hacking-bundle>
