What is Monkey Gamepad ? Why is it so popular among gamers and why is it chosen by so many people? Let's learn about Monkey Gamepad through the following article.

What is Monkey Gamepad?

Monkey Gamepad is a free application that is quite simple and easy to use to map a gamepad or a player's controller to an Android phone screen. In other words, Monkey Gamepad is a free application to map a player's controller to an Android phone screen.

With popular games like **PUBG** , **Free Fire** and **Call Of Duty** with your own controller completely free and no need to activate or any other action.

Players absolutely do not need to activate with PC or Android phone to use the application anymore, the only thing to do is to connect directly to the phone and play the game.

Features of Monkey Gamepad

No activation required

Monkey gamepad is a safe and powerful keymapper, which is considered easy to use and does not require any activation process. This means that players can play games comfortably without having to connect their phone to

PC Gaming or any other Android phone device.

The reason is that Monkey Gamepad is configured with an independent game runtime environment that has no connection to any third party, so players can install games directly from the Play Store in the Monkey App. This allows players to play games anywhere, anytime.

No cloning

One of the special features of Monkey Gamepad is that it does not clone, which is quite safe for gamers who are passionate about banned games without fear of any strict regulations. Monkey does not clone the application but instead downloads the games again in Google Play to work.

Good Gamepad compatibility

Almost all gaming controller brands today are compatible with Monkey Gamepad, providing the best gaming experience without any interruption or difficulty.

Major Gamepad brands on the market today such as: Xbox, **PS4** , **PS5** , Ipega, GameSir, Logitech,.

Preset Map

Preset main profiles for games without spending extra time on setup.

Highly customizable

In addition to the preset keys, players can completely define their own keymap that suits themselves and their hand shape to enhance their gaming experience for the best.

Voice recorder

Monkey Gamepad also has a built-in recorder that can help record the screen, sharing the player's winning scoring moments.

Rights required

Devices when installing Monkey Gamepad require very few device permissions: only storage and microphone access.

Increase the rate of safety and information security for users.

Some notes when downloading Monkey gamepad

The Monkey gamepad version will only support the main gamepad when operating, so the keyboard and mouse will temporarily stop working when the user is playing the game.

Currently Monkey is only compatible with 64-bit phones, 32-bit phones will not be supported.

Monkey gamepad is not yet an official release, it is still in beta so there may be some performance issues or other issues.

Get game support from Play Store temporarily.

Above is the basic information about **Monkey gamepad** that players need to grasp to be able to experience playing games on the application in the best way without any difficulties or obstacles.
