

# Learn about permanent ice cold

On the market today there appears a permanent cold stone being used by many users, in addition to not losing the taste of drinks, it can also be used many times, even permanently. So what is eternal cold stone, what does it do and is it safe?

In the summer, many people have the habit of putting ice in drinks to cool down. However, frozen ice will lose the natural flavor and lighten the drink. However, on the market today there appears a permanent cold stone which is being used by many users, in addition to not losing the taste of drinks, it can be used many times, even forever. . So what is eternal cold stone, what does it do and is it safe? Let's find out through the article below.

## What is permanent cold stone?

Eternal cold ice or insoluble ice is also known by other names such as Cooling Cubes, Scotch Rochs or Whiskey Stones, invented in 2007 by Dave Laituri, a living designer in Massachusetts, USA. After the announcement, permanent ice cold is rapidly being widely used in the US and European countries.

Insoluble ice has the same shape and size as normal cold ice cubes, each weighing 70 grams, 25mm x 19mm in size.

The insoluble stone shell is made of 304 stainless steel material, safe for human health, inside is a cooling gel compound.

### **Advantages of permanent cold stone compared to normal cold stone**

1. Cool drinks quickly but still keep intact the taste of drinks.
2. 304 stainless steel material is clean, safe for human health.
3. Save water and cost if demand for cold ice is high.
4. Fast cooling time.

### **How to use permanent ice**

Put ice cubes that don't dissolve into the freezer compartment for 2 to 4 hours before using it.

The amount of stone used depends on different cooling requirements. But with 2-4 permanent cold stones can cool 1 liter of drinks after 5 minutes.

The freezing time of permanent stone varies, depending on the brand and the condition but is in the range of 40 to 60 minutes. There are unknown insoluble stones that can only be kept cold for about 10 minutes but products from reputable brands of Japan and the United States can extend the cold-keeping time to several hours.

After use, simply wash the permanent stone with clean water for reuse in subsequent times.
