What smartwatch smartwatch has outstanding features?

Smartwatch or smart watch has a design that is quite similar to a regular clock, but is equipped with more features than just stopping the date and time display. The outstanding features commonly found in Smartwatch include:

1. Display date and time, alarm
2. Connect wireless bluetooth to many peripheral devices, especially smartphones. Thanks to this capability, smartwatch allows users to receive notifications and make calls, messages, play music, transfer data, control cameras, etc. There are also many smartwatches with sim independent of smartphones.
3. Support to insert memory cards to download music and movies
4. Connect to wifi / 3G, help users to surf the web, watch movies, play games, download applications, make calls on zalo, facebook.
5. Health monitoring function through important indicators such as heart rate, blood pressure, sleep, .
6. Exercise support function: Smartwatch clock can record the training process, count the number of steps, calculate the distance traveled, determine the amount of calories consumed. The collected data will be aggregated and analyzed via an application connected to the user's smartphone.
7. GPS navigation feature

8. Some high-end Smartwatch smart watches are also equipped with cameras to help shoot and take pictures; weather forecast function; recording, changing voice, finding and preventing phone loss; remind users when sitting too long, when stress needs to be rested or when taking medication; computer function, .
9. Support payment via online payment gateway
10. Listen to the FM radio

Smartwatch Smartwatch - product of technology

Notes when buying Smartwatch watches

It must be said that in recent years we have witnessed the explosion of Smartwatch lines. They are constantly improving on designs, designs and features. So how to choose the product that really suits me? The following criteria will help you:

1. Designs, designs

Smartwatch Smartwatch has a multitude of designs, different designs. Each person has a particular hobby and they should base it on that to choose the right product for themselves. However, Smartwatch usually cannot be changed as often as regular watches, so you need to consider the style of clothing when buying this device.

2. Compatibility with Smartphone

Each line of Smartwatch is designed on one or several certain technologies. In other words, not all smart watches are connected to every touch phone. You need to determine if the Smartwatch you intend to select can be connected to the current smartphone.

3. Durability and water resistance

The smart watch will follow you in every activity and you can't always pay attention to protecting it. Therefore, prioritize devices made of high-quality, durable and water-resistant, scratch-resistant materials.

Should choose smart watches with water resistance

4. Operation time

Smartwatch usually only works for a certain period of time then need to charge more energy. The bigger the clock, the longer the battery will work and vice versa.

5. Other features

Not all Smartwatch watches have all the features we've listed above. The following Smartwatch generations are always more advanced than the previous generation. Take a look at your own preferences and needs to choose the product with the right features.

Smartwatch watch price how much?

Listening to smart watches, many people will think its cost is very expensive. But in fact, these devices have many selling prices ranging from cheap to high-end. The low price ranges from a few hundred thousand dong to several million dong, the medium range will cost from several million to several tens of millions, while the high-end type can cost several hundred million dong. Therefore, do not be worried because we will be sure to have a product that fits your budget.

What brand of smartwatch smartwatch should you buy?

There are many manufacturers of smartwatch smart watches, but the most popular must include Apple, Samsung, Sony, Fibit, Xiaomi and Garmin.

1. Apple Smartwatch clock

Apple is a famous name in the field of technology with a series of high-end products, typically Smartwatch. The Apple smart watches have the advantage of a luxurious design, possessing many smart applications, integrated speakers and microphone. They allow users to listen to the call and write a message like a phone. However, this Smartwatch line has the disadvantage of a large charging cord and only supports iPhone.

2. Smartwatch Fibit watch

Fitbit is one of the world's leading brands founded by Eric N. Friedman and James Park. Fibit smart watch impresses with a youthful, modern design and is equipped with smart technology platform. In particular, the selling price of products of Fiberit is quite soft so it has received enthusiastic support from users.

3. Samsung Smartwatch watch

Samsung is no less than Apple when launching smart watches that stand out from design to technology. Among Samsung products, Samsung Gear 2 Smartwatch is said to be much more outstanding than the older versions.

4. Sony Smartwatch watch

Sony's Smartwatch series has the advantage of being compact, fashionable and cheaper than some of the same products. Some disadvantages can be encountered in these products such as unstable management or low screen resolution. However, in recent years, Sony has constantly made efforts to improve its products, overcome disadvantages, giving users a better experience.

5. Xiaomi Smartwatch watch

Xiaomi is a sizable brand in China. Xiaomi products are quite diverse in design and style, while the features are constantly being improved. Selling price of Smartwatch Xiaomi is quite cheap, only from a few hundred thousand dong.

6. Garmin Smartwatch clock

Garmin offers users many versions of Smartwatch with different styles from youthful, personality to elegance and sophistication. In terms of technology, Garmin's products are not inferior to any brand. Garmin has many devices in the cheap and mid-range segments, which are very suitable for Vietnamese people.
