

# Learn about Windows ghost software Onekey Ghost

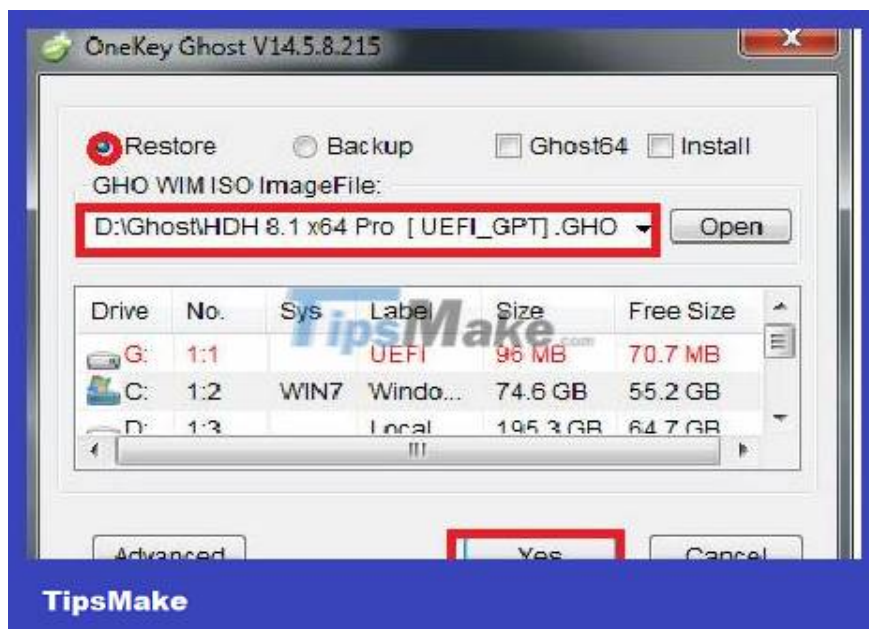

Onekey Ghost is software that helps Ghost on Windows quickly and easily with just a few clicks.

As you know, to save time and still ensure that the Windows operating system in use is always like new after installation, computer ghost is the easiest way.

Having to reinstall both Windows and the driver will take at least 2 to 3 hours to complete. Ghost Windows helps you save maximum time because the ghost extraction process only takes about 20 - 30 minutes at a time, your computer will be guaranteed full functions and drivers like a completely new installation. One of the useful tools to help do this is Onekey Ghost.

## What is Onekey Ghost?

Onekey Ghost is software that helps ghost on Windows quickly and easily with just a few clicks.

## What advantages does Onekey Ghost have?

To use a regular ghost application, you need Hiren's BootCD, create a USB boot or install an application that boots from the HDD. These methods require booting into the corresponding device, which many of you will find a bit difficult.

The solution is a ghost application directly from Windows - Onekey Ghost. This is an option for the entire ghost process from the old version of Win you are using. As long as you have a ghost version in your computer, run the Onekey Ghost application and the ghosting process is completely automatic. You just need to wait for the application to run, make sure the device has enough battery life, and the device operates continuously.

To perform ghost Windows, users must use Hiren's BootCD to perform all processes and this will be very difficult for those new to computers. Instead, users can use Onekey Ghost software to ghost Windows and extract the ghost when necessary with just a few simple clicks.

Onekey Ghost is software that provides users with a Windows ghost solution, including Windows XP/7/8/8.1, quickly and easily with just a few simple mouse clicks. Not only that, all user settings in the C: drive will be packaged in a single file, much smaller than the current capacity but still containing all the necessary information.
