

Learn and Compare maps in Among Us

The map is always a factor that creates the attraction of a game and Among Us is no exception. This article will sum up everything you need to know about the maps in Among Us.

How many maps is Game Among Us? **Among Us** currently has all 3 maps. The first original map was The Skeld, released with the game in 2018. Mira HQ was released on August 8, 2019 and the latest map is Polus. All 3 **Among Us maps** were released before the game became famous.

Among Us's layout and features of each map

1.The Skeld

Among Us 's original map , The Skeld is still the most popular. Its size is half that of Mira HQ and Polus. The Skeld includes the most basic quests on all maps of Among Us. This is also the easiest map to identify impostors because they cannot perform the mission. You can refer to [How to complete each task on the map of Among Us's Skeld on TipsMake](#).

2. Mira HQ

Mira HQ is the second and smallest map in the game. It's also the only map that doesn't have a security camera but in return has a door log mechanism, letting you know who has been there.

In addition, the Mira HQ is the only map that doesn't have any Vent - Closed vents. All Vent are linked together. This means an Imposter impersonator can jump into Vent anywhere. In particular, the Mira HQ has the fewest quests, making it an attractive choice for Imposter.

3. Polus

Polus is a new Map that is completely different from The Skeld and Mira HQ. Among Us, Polus is the only current outdoor map. One of the unique mechanisms of action on Polus is the Vitals tool, which allows players to check the status of all members on the map. Thanks to that, you will know who died before they are found. This feature is useful for both crew of astronauts and imposters (especially when working in groups).

Above everything you need to know about the **maps in the game Among Us** . TipsMake will update you information about the latest map Among Us as soon as it is released.
