

Learn Avira product life cycle information

Security software researchers and manufacturers Avira is always oriented, maintaining technologies to provide maximum support to users. And this support time also varies according to the respective product type

Security software researchers and manufacturers Avira is always oriented, maintaining technologies to provide maximum support to users. And this support time also varies according to the respective product type . This approach provides customers and businesses - those who are directly using Avira products and technology, the assurance and certainty of the security platform they require. Avira's motto is based on the following two criteria:

- Avira always supports operating systems for longer than 12 months - compared to the normal production cycle of an operating system
- Avira announced at least 3 years' notice before stopping support for a certain operating system

List of Microsoft operating systems and Avira specific support dates

Microsoft Windows 2000

July 13, 2011

Microsoft Windows 2000 Server

July 13, 2011
