In today's article, **TipsMake** will guide you to fix the problem of **Word files having** . If you are having difficulty with this problem, let's find out right away.

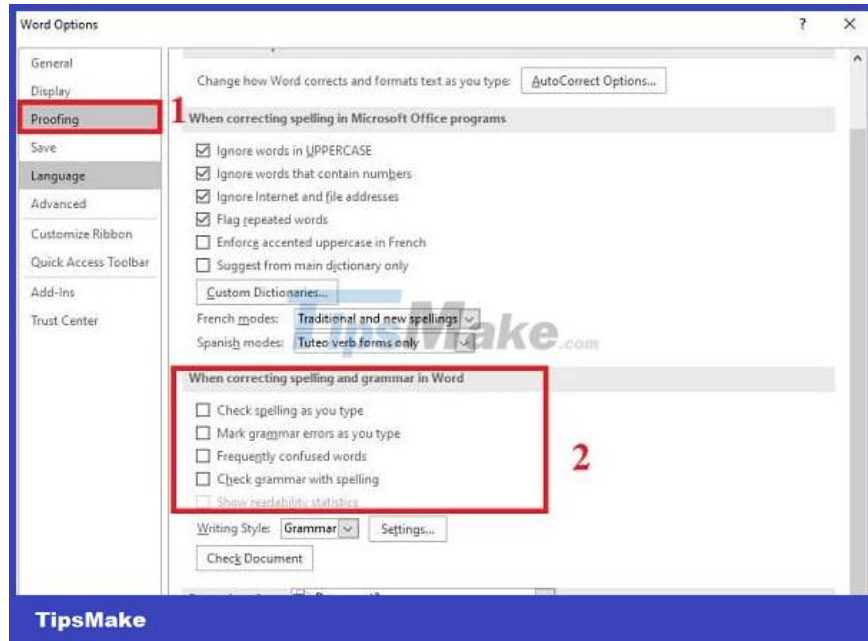

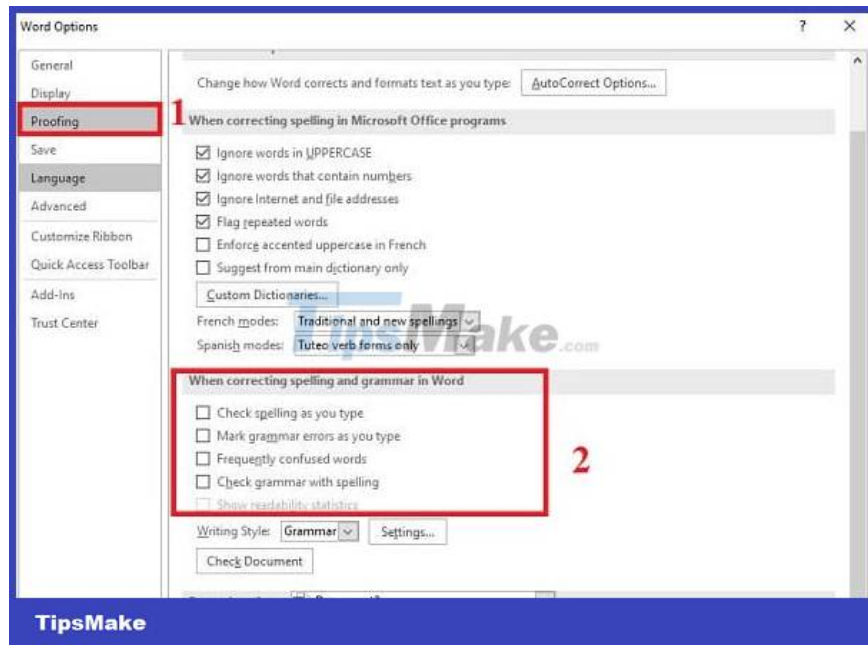

Learn tips to fix Word file errors effectively and quickly

*To put it simply, the Word file error is that when you open a Word file, the characters and letters inside have no space and are stuck together. The reason may be because you use an old version to open a Word file with a new version, so there is a version conflict. Or it's also possible that it's because of copying data from other software, or vice versa, opening documents from other software with Word. Whatever the cause, **the solution** is not too complicated. As follows:*

Share how to fix stuck text errors in Word 2016

Instructions on how to save Word files without text

If you are a text editor and need to share Word files with others. This is a way to save the file so that when the person downloads and opens it, there will be no text attached to it. This method only applies to 1 file and cannot save multiple files at the same time.

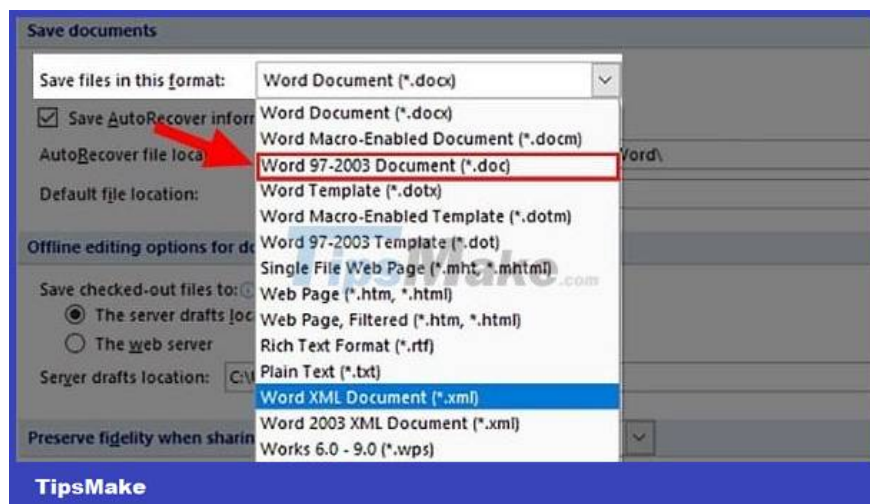

1. **Step 1** : In the Word file you need to save and share > Click the **File** tab > Select **Save as** and select the location you want to save as usual.
2. **Step 2** : At the **Save as** interface > Go to the **Save as type** section > Click to select **Word 97-2003 Document (*.doc)** (as shown). Click on the drop-down arrow next to it and a list will appear for you to choose from.
3. **Step 3** : After selecting, click **Save** .

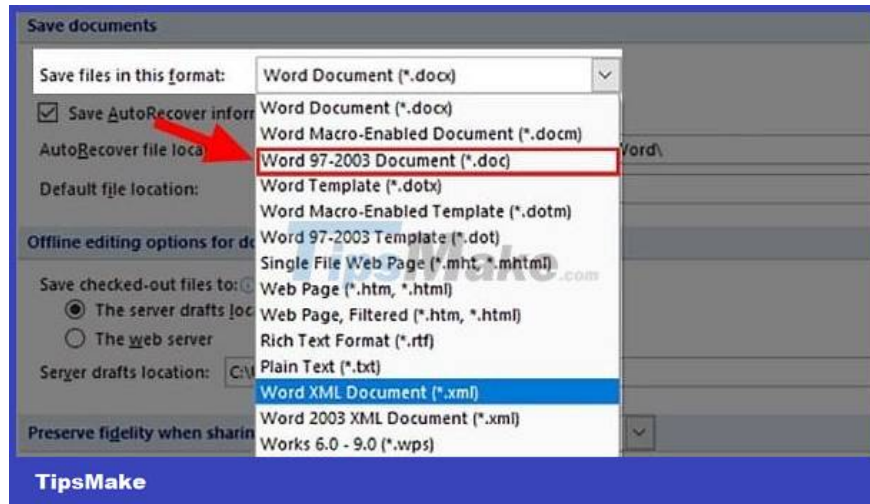

1. With Word 2003/2007, you do the same thing, except that on the File tab you will click on the Microsoft Office icon.

If you need to save multiple Word files without text

1. **Step 1** : The user also opens the Word file > Click the **File** tab > Select **Options** .
2. **Step 2** : Click the **Save** tab in the left column > In the **Save Documents** section , find the line **Save files in this format** > Select the arrow and click **Word 97-2003 Document (*.doc)** > Click **OK** to save again.

Note: With Word 2007, 2003: Open the Word file > Click the **Microsoft Office** button > Click to select **Word Options** > **Save** > **Save Documents** > At the **Save files in this format** line > Select **Word 97-2003 Document (*.doc)** > **OK** .

Above are all the ways to fix Word file errors in all versions. Hope you do it successfully!
