The appearance of many current IT certificates from many different trainers makes it very difficult for users to choose a suitable certificate. Network management certificates for companies, hardware, software, etc. have different functions.

Without understanding the capabilities of hundreds of IT-related certificates through its abbreviations, users will step into a jumble.

In this tutorial, users can check related issues as well as certification skills that correspond to the certificate the user wants to receive. These certificates have different prices and are considered the most popular IT certificates for network professionals (see more at <http://www.gocertify.com/certification/>).

Microsoft (MCSE, MCITP, MCTS)

Among Microsoft certifications, the most popular are Microsoft Certified Engineer (MCSE), Microsoft Certified Technology Specialist (MCTS) and Microsoft Certified IT Professional (MCITP).

The requirement to acquire MCSE certificate is 1-2 years of experience in designing, installing, configuring and troubleshooting network systems. Not only that, in order to receive a certificate, you must go through a rigorous test worth 875 USD. And according to PayScale.com, the average salary in a year to pay for an MCSE certified IT manager is up to 77,000 USD.

MCITP requires to be a professional IT specialist with 1-5 exam numbers, each costing 125 USD. There are a total of 12 lessons about MCITP. The salary for an IT specialist in a year has this certificate ranging from 47,000 to 70,000 USD.

Finally, MCTS requires 2 years of experience in handling specific problems.

CompTIA (A +, Network +, Security +, Linux +)

Certificate of Computing Technology Industry Association certifies for neutral suppliers. This is the best option if the user is looking for a consultant combined with experience to overcome a single brand.

Among CompTIA certifications, A + is a basic certificate that requires a practical experience of over 400 hours. More complicated is that Network + must have award certificates of classes, the number of accredited scores must be at least 720/900, the test cost is 239 USD.

In order to achieve Security + certification, the cost is 258 USD with a minimum score of 750, Linux + certification point is completely similar to Security +. The salary of people receiving certificates every year also ranges from 40,000 to 80,000 USD.

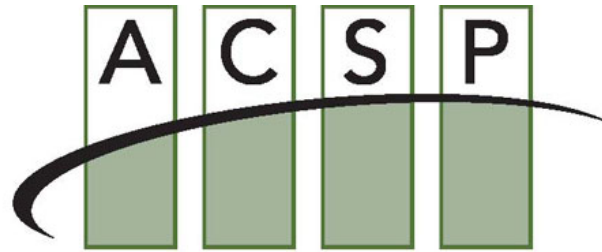

Cisco (CCNP, CCNA, CCIE)

Considered the most popular, the Cisco Certified Network Associate (CCNA) includes basic certification of the ability to install and manage network systems. It requires a test at a cost of up to 250 USD and a validity period of 3 years.

CCNA is a prerequisite for certifying a mid-range certificate, the Cisco Certified Network Professional (CCNP), which requires 3 exams within 2 hours at a cost of 600 USD. Higher than the Cisco Certified Internetwork Expert certificate (CCIE) is considered a Cisco gold certificate with 7 hours of testing and a cost of \$ 1,750. But to be eligible for this certification exam, the test taker must meet the 8-hour working conditions and mark with a written test.

Apple (ACSP, ACTC)

ASSOCIATION OF CLOSET AND STORAGE PROFESSIONALS

This is the Apple certificate for Mac system management skills. This certification includes 2 types: Apple Certified Support Professional (ACSP) and Apple Certified Technical Coordinator (ACTC) with basic support skills and proven by tests at a cost of USD 200 and USD 400 respectively .

For network support, Apple Certified System Administrator (ACSA) certification is required with a total cost of \$ 650 for the exam. For Mac engineers, Unix expertise is a significant advantage.

International Information Systems Security Certification Consortium (CISSP)

Being understood as a professional information security certification system, CISSP is the most valuable certification to perform exclusive transactions and needs deep security. In order to achieve CISSP, he or she must meet at least 5 years of working experience in related fields such as architecture and security design, then must pass the exam at a cost of 599 USD. In addition, to extend the certificate, the certificate holder must pay an annual fee.

Information Systems Audit and Control Association (ISACA)

Student Group

This is an advanced certificate for IT security experts and auditors with 5-year work experience. The test costs 415 USD or higher. High-tech consultants seeking this certification seal will enjoy a high average annual salary of up to \$ 87,000.

Project Management Professional (PMP)

This certificate is for those who work in higher education and have at least 3 years of project management experience. The exam took place with 200 questions costing \$ 555, the average salary for IT project managers PMP is \$ 89,000.

Note: The above price is for reference only, may vary by country, region and region.
