The pair of anti-humpback Randoseru is known to be an indispensable item for Japanese students. Where does this briefcase come from, what is its structure and characteristics? Follow [Quantrimang](#)'s article to get answers around this special briefcase!

The origin of Randoseru pair of anti-humpback

Originally, Randoseru was a backpack designed for Japanese soldiers when the bakufu government introduced a Western-style military system originating from the Netherlands.

The name Randoseru also comes from the word "Ransel" in the Dutch language.

In 1885, Gakushuin Royal Primary School began to popularize this backpack. And then, it became more famous when the Prince of Japan started using Randoseru.

At that time, Randoseru was still unpopular because it was too expensive for ordinary people. It was not until 1960, when the economy of the rising sun country had a strong growth step, the pair of Randoseru was more widely used.

In March 2014, when the image of American actress and singer Zooey Deschanel wearing red Randoseru was spread, it was also the time when the backpack of Japanese elementary school students was famous all over the world.

Another powerful factor that helped Randoseru is Japanese comics. Many Anime fans like to learn the beauty of the Funeral culture through the series and pay special attention to Randoseru.

When coming to Japan, many tourists will come to the famous Randoseru production facilities to find and buy backpacks, of which 2 are highly appreciated:

1. Tsuchiya Bag Company in Tokyo with over 50 years of production experience Randoseru specializes in selling backpacks for adults, with two black and brown colors and some changes in trendy designs, and must be reserved.
2. HERZ company produces backpacks for both children and adults, people use high quality leather, usually with camel or dark green color. The price of each backpack includes tax of 59,400 yen (nearly 12 million VND), however, you must book two months in advance.

Through the history of development, the Japanese anti-humpback cases became more and more popular in many countries around the world. This is not only a compulsory item for Japanese elementary school students, it also becomes a Japanese cultural beauty widely known by the world through movies and comics.

What is Randoseru pair of anti-hump? Structure and characteristics of the pair Randoseru

What is Randoseru?

Randoseru is a backpack with two shoulders. This is a mandatory item, required by the Japanese government for elementary students to use during the first 6 years.

Pair of anti-humpback Randoseru used to hold textbooks, notebooks, other school supplies. Initially, Randoseru only has 2 basic colors, red is usually for female students and black will usually be for male students.

Structure of the pair Randoseru

Randoseru's anti-humped pairs are usually made of real leather, artificial leather or sometimes made of horse skin. Its typical size is 30cm x 23cm x 18cm respectively in height, width and depth. In addition, Randoseru has a slightly larger size to fit in A4 paper.

Previously, pair Randoseru weighing about 1.2kg. However, to meet the need for weight loss for students since 2004, about 70% of Randoseru pairs have been replaced with Clarino synthetic leather, lightweight waterproof material.

The Randoseru anti-hump pair is designed with a large main compartment to accommodate both books and additional compartments to accommodate other items.

Characteristics of the pair of anti-humpback Randoseru

There is a very special point that is the pair of Randoseru completely made by hand. To make this briefcase, workers have to go through 10 production processes with more than 100 different parts. This is also one of the reasons why these pairs are so expensive.

The Randoseru anti-hump pair has the following advantages:

1. Special structure, contact pads with thick and hard back help spread weight evenly, reduce weight for the back. The 3D strap design helps the shoulder not to sag and the back is not hunched when used for a long time. Using Randoseru anti-hump pair will help support the child's immature skeletal system.
2. The product is very durable, has a life expectancy of up to 5-6 years depending on the user.
3. Colors and textures are quite diverse to help children easily choose the right taste.

What is the price of anti-humping Randoseru?

On the market today, you can easily find pairs of Randoseru for many different prices from \$ 80. However, in Japan parents often choose pairs for children for about \$ 300, even someone who is strong to invest about \$ 800 to \$ 900.

Buy genuine Randoseru anti-hump backpack, where is the quality?

Currently, in Vietnam market, consumers can easily buy famous Randoseru backpacks.

META.vn is a typical example of supplying and distributing backpacks Randoseru with many different prices. In addition, when you come to META, you can also refer to the Randoseru backpack model of Vietnam which is produced quite subtly and meticulously at an extremely attractive price.
