

# Lenovo confirmed the laptop running Android

After there are reports that Lenovo is building a laptop running Android with a 10-inch screen, Lenovo spokesman on October 11 confirmed this to be accurate.

**After there are reports that Lenovo is building a laptop running Android with a 10-inch screen, Lenovo spokesman on October 11 confirmed this to be accurate.**

Lenovo has just confirmed it is making a laptop running Android - (*Photo: Lenovo*)

According to *PhoneArena*, Lenovo's first Android-powered laptop will be called **IdeaPad A10**, using a 10-inch screen that achieves HD resolution. In it, the Android 4.2 version will be the built-in version of this laptop.

Lenovo initially said that its Android-powered laptop will have a hard QWERTY keyboard, with a 360-degree fold-down design that can rotate the camera at various working angles.

In terms of configuration, **IdeaPad A10** will use Rockchip RK3188 Cortex-A9 quad-core processor to reach 1.6 GHz, optional 1 GB or 2 GB RAM, 16/32 GB internal memory, 2 USB 2.0 ports, 1 microUSB port, microSD card slot, mic / headphone jack, stereo speakers, HDMI, Wi-Fi, Bluetooth, 0.3 megapixel front camera.

However, when the device will be officially announced, Lenovo has not said, but only said that it will come in "*soonest time*".
