

## Lenovo IdeaPad laptop series

Lenovo has just launched a brand new laptop called IdeaPad, aimed at mainstream users, with a highlight in its glamorous appearance and face recognition technology.

**Lenovo has just launched a brand new laptop called IdeaPad, aimed at mainstream users, with a highlight in its glamorous appearance and face recognition technology.**

Since acquiring IBM's computer manufacturing division, Lenovo has been known primarily to consumers with two ThinkPad laptop brands and ThinkCentre desktop computers. However, for the average user, who has the largest number in the market, it seems that Chinese computer firms have not received adequate attention. That made them "fall" a huge benefit.

To overcome this weakness, before CES 2008, Lenovo announced three new popular laptops, Y510, Y710 and U110, marking the birth of the IdeaPad brand. All three new laptops have appeared at the largest consumer electronics fair of the year and have attracted the attention of quite a number of visitors, thanks to possessing good looks, affordable prices and many jobs. advanced technology.

Lenovo IdeaPad Y710 has a 17-inch screen, the lowest price is \$ 1,200. *Photo: **Laptopsing***

Three new Lenovo laptops with screen sizes of 11.1 "to 17", equipped with Dolby Home Theater surround sound system and face detection technology called "VeriFace". Besides the sexy appearance, the VeriFace feature is also a highlight to create a big attraction for Lenovo's popular laptops. This feature allows users to set a password for the device with their own face, with the help of the built-in 1.3 Megapixel camera. It not only helps users more convenient when they no longer have to memorize passwords in their heads, but also enhances the security of new machines.

Of the three new IdeaPad laptops, the Lenovo Y710 is the most bulky model, with a 17-inch widescreen display with a 1,440 x 900 pixel resolution. It is equipped with 2.5 GHz Intel Core 2 Duo processor, ATI Mobility Radeon HD2600 256 MB graphics card and can support 2 hard drives, with a maximum capacity of up to 500 GB. Besides, IdeaPad Y710 also has 2 GB of memory (can be upgraded to 4 GB), 1.3 Megapixel camera and 2-layer DVD burner or Blu-ray reader. It supports standard 802.11a / g / n wireless connection. In addition, this entertainment laptop is also equipped with 4 stereo speakers and 1 subwoofer, touch-sensitive multimedia features management keys and ultra-thin screen edges. Lenovo IdeaPad Y710 will be available in March for \$ 1,200 or more.
