

Lenovo introduced G series laptops and new IdeaPad Z

Lenovo G series is a laptop with a solid design, full of basic features, while the IdeaPad Z models are geared towards fashion style, performance and advanced entertainment support features.

Lenovo G series is a laptop with a solid design, full of basic features, while the IdeaPad Z models are geared towards fashion style, performance and advanced entertainment support features.

Lenovo on August 6, 2012 introduced in Vietnam a series of laptop models with 2 main styles.

Lenovo G480 and G580 are equipped with Intel Core i 3rd generation processor, 8GB memory and HDD with 1TB capacity. Lenovo G480 and G580 come in three dark brown, navy blue and red.

Lenovo G series with impressive blue water turn.

In addition to the usual keys, G480 / G580 has additional number keys to support the work of entering data.

It is equipped with an HD graphics card or NVIDIA GeForce GT630 1GB (optional for users), stereo audio and Blu-ray drive built-in.

G Series meets the basic entertainment needs of users. The product is also pre-integrated with its software suite such as OneKey Rescue System (allowing for easy data backup and recovery), Lenovo ReadyComm (to help manage the network and Internet connection), Intelligent Touchpad mouse table , Thermal management system (Thermal Management System) .

Lenovo G series has a starting price for Core i3 CPU about VND 10,290,000.

IdeaPad Z380, Z480 and Z580 are equipped with Intel Core i 3rd generation processors and various options for graphics processing technology. This model better meets the multimedia entertainment needs.

Lenovo IdeaPad Z series with shell still sinks.

In particular, the surface layer of the case is designed with transparent 3D effects and youthful colors such as ivory white, red, blue and pink (the new Z Series also has more gray color options but no effect. 3D).

The IdeaPad Z series is equipped with NVIDIA GeForce GT640M 2GB graphics card supporting DirectX11, 16:9 widescreen LED HD display, 0.3MP camera, optional DVD reader or Blu-ray drive built-in and support card HD screen.

The device has an HDMI port and Intel WiDi wireless display technology for multimedia entertainment content on a larger HD screen.

In addition, Lenovo's new models include BootShield technology that makes it faster to boot even when users have installed more applications. Currently products are available in the market.

Z Series has a starting price of 13,000,000 VND.
