

Lenovo introduced the new U Series laptop

The Lenovo U31 and U41 are a reliable choice for those who wish for a machine that blends the best value of use and features, meeting daily work and entertainment needs.

The Lenovo U31 and U41 are a reliable choice for those who wish for a machine that blends the best value of use and features, meeting daily work and entertainment needs.

On April 24, Lenovo launched the new U Series laptop with two models of Lenovo U31 and U41 with outstanding performance, impressive entertainment capabilities and stylish fashion design.

In today's digital world, an electronic device is not merely a tool for entertainment and work. It is also a fashion accessory for discerning people who are always on the move. Both new models have a thin and light design: the new U31 13.3 inch weighs only 1.5 kg, is 19.3 mm thin, while the 14-inch U41 weighs 1.65 kg and is 19.5 mm thin.

Despite being light and thin, the U Series offers the impressive handling capabilities of a powerful mobile office. The device has the latest Intel 5th-generation processor option and selects NVIDIA's new generation GeForce graphics card. The U Series can meet all those needs thanks to the integration of great entertainment features, such as the Dolby Home Theater speakers for superior surround sound experience with Wi-Fi 802.11 a / c speeds. height.

Lenovo U41 (*including black, silver and red versions*) is now available at computer stores nationwide with a starting price of **10,999,000 VND** . Meanwhile, the Lenovo U31 (*white and red version*) will be available in the middle of May with a starting price of **10,999,000 VND** . Both U31 and U41 are covered by a 2-year warranty nationwide.
