

Lenovo introduces the WOS Yoga C630 equipped with Snapdragon 850 chip, battery of 25 hours, Windows 10

Lenovo has unveiled the first Yoga to run a Snapdragon 850 chip at the IFA 2018 event called Yoga C630 WOS (Windows on Snapdragon).

Lenovo has just released the first Yoga to run a Snapdragon 850 chip at the IFA 2018 event called Yoga C630 WOS (Windows on Snapdragon).

Yoga C630 WOS is equipped with a 13.3-inch Full HD screen, iPS panels support a stylus, has 2 USB-C ports and supports 3.5mm headphone jack. In addition, the screen of the device has a touch to support rotation 360 degrees.

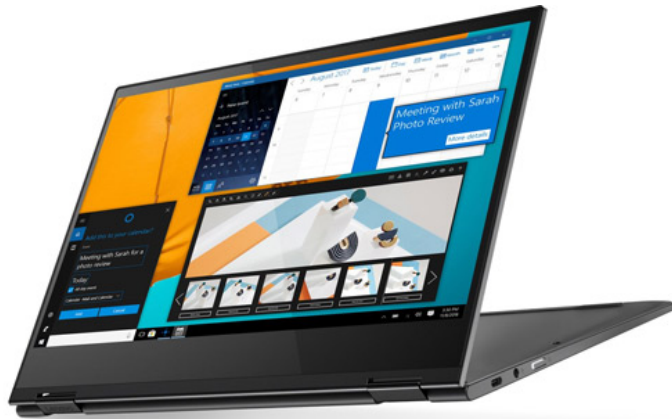

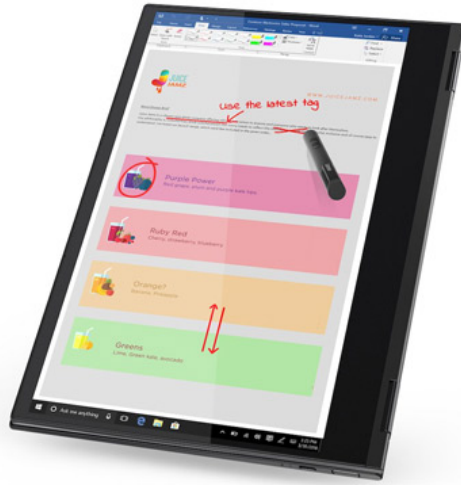

There are 2 options for memory: RAM 4 or 8GB and 128 or 256GB SSD. The Yoga C630 WOS is still running Windows 10 S and, if necessary, can be changed to Windows 10 Pro mode. Integrated with Snapdragon 850 chip, this laptop also supports 4G mobile network.

Just like last year's Yoga machines, the Yoga C630 WOS has a screen edge of 3 thin edges and a thicker bottom edge.

According to Lenovo's promise, the Yoga C630 WOS will have Miix 630 to 30% higher performance and maximum battery life of up to 25 hours.

The Yoga C630 will be sold at a price of USD 849.99 (equivalent to VND 19.5 million) and will be officially put on shelves in November 2018.
